

Day 19 - Agent Detail Pages 100% Closure

Date: 2026-05-09T17:14:30Z

Branch: to-knowledge-mc

Status: OWNER_GATED

Lane

Agent detail pages for the Gateway Agent Hub.

Day 19 is developer-side closed with truthful owner gating. The routed detail pages are implemented, tested, pushed, deployed into the local-only proof runtime, and browser-rendered. Final owner-authenticated visual acceptance remains owner gated.

What Was Implemented

- Added routed Agent Hub detail pages:
 - /gateway/agent-hub/agent-zero
 - /gateway/agent-hub/hermes
 - /gateway/agent-hub/space-agent
 - /gateway/agent-hub/pi-mono
 - /gateway/agent-hub/openclaw-plus
- Preserved the accepted FULL v3 designer mock mount.
- Added fragment support to the designer frame so detail routes open the corresponding accepted Agent Hub tab/detail panel.
- Added hash bootstrap in Agent Hub.html so a direct route loads the matching detail view instead of dropping the owner on the overview.
- Kept the existing /gateway/agent-hub/paperclip route intact.
- Added regression checks for the dynamic detail route and hash bootstrapping.

Files Changed

- src/components/gateway/DesignerGatewayMockFrame.tsx
- src/app/gateway/agent-hub/[id]/page.tsx
- public/designer-mission-control/design/gateway/Agent Hub.html
- src/lib/gateway-native-frame-decision.test.ts
- src/lib/gateway-agent-hub-designer-data.test.ts

Routes Changed

New protected route:

- /gateway/agent-hub/[id]

Supported detail IDs:

- agent-zero
- hermes
- paperclip
- spaceagent
- space-agent
- pi
- pi-mono
- openclaw
- openclaw+
- openclaw-plus

Unknown IDs return Next notFound().

UI Behavior

- Agent Zero route opens the Agent Zero detail tab.

- Hermes route opens the Hermes detail tab.
- SpaceAgent route opens the SpaceAgent detail tab.
- Pi route opens the Pi-mono detail tab.
- OpenClaw+ route opens the OpenClaw+ detail tab.
- Buttons remain truthful:
 - local UI buttons are disabled where localhost/Tailnet proof is not available.
 - protected command buttons are Bridge Session gated.
 - audit/route buttons point to protected Mission Control routes.
- No fake execution was added.
- No custom React redesign was added.
- No OpenCloud architecture label was added.

Service And Runtime Behavior

- Code commit pushed: 20a981fa48f5a41c05971b0a7c3d14af93d5fc9e
- origin/to-knowledge-mc includes: 20a981fa48f5a41c05971b0a7c3d14af93d5fc9e
- Deploy script rebuilt standalone bundle for commit 20a981f.
- Deploy script reported PID 81018 on 127.0.0.1:3337, then the child process exited after reading.
- Local-only screen-backed proof runtime restored:
 - screen: mc-day19-agent-details
 - PID: 81158
 - bind: 127.0.0.1:3337
- /login returned 200 on the restored proof runtime.
- No new public exposure was added.

Tests Run

- git diff --cached --check: pass
- staged secret scan: pass
- .env diff check: clean
- pnpm run typecheck: pass
- pnpm run build: pass
- pnpm test: pass, 149 files / 1302 tests
- node scripts/check-protected-file-invariants.mjs: pass
- MISSION_CONTROL_API_KEY=[redacted smoke key] node scripts/check-protected-actions-locked.mjs http://127.0.0.1:3337: pass, 11 checks

Route Smoke

Unauthenticated:

- /gateway/agent-hub/agent-zero -> 307 /login
- /gateway/agent-hub/hermes -> 307 /login
- /gateway/agent-hub/space-agent -> 307 /login
- /gateway/agent-hub/pi-mono -> 307 /login
- /gateway/agent-hub/openclaw-plus -> 307 /login

Authenticated local proof context:

- /gateway/agent-hub/agent-zero -> 200
- /gateway/agent-hub/hermes -> 200
- /gateway/agent-hub/space-agent -> 200
- /gateway/agent-hub/pi-mono -> 200
- /gateway/agent-hub/openclaw-plus -> 200

Detail API Proof

Authenticated API probes returned 200 for detail, health, routes, and audit across:

- agent-zero
- hermes
- space-agent
- pi-mono

- openclaw-plus

Observed truthful states:

- Agent Zero: partial_go; health blocker agent_zero_full_go_requires_downstream_route_completion
- Hermes: gated; health blocker hermes_degraded_or_pending_live_proof
- SpaceAgent: read_only; health blocker firecrawl_credential_required
- Pi-mono: read_only
- OpenClaw+: blocked; health blocker openclaw_doctor_runtime_not_reachable

Browser Proof

Proof artifact:

- runtime/day-19-agent-detail-pages-local-proof.json
- runtime/day-19-agent-detail-pages-local-proof.png

Browser proof used Chromium at 1480x900 against http://127.0.0.1:3337 with local authenticated proof context.

Verified:

- /gateway/agent-hub/agent-zero loaded Agent Hub.html#agent-zero and displayed Agent Zero CONNECTED.
- /gateway/agent-hub/hermes loaded Agent Hub.html#hermes and displayed Hermes GATED.
- /gateway/agent-hub/space-agent loaded Agent Hub.html#space-agent and displayed SpaceAgent READ-ONLY.
- /gateway/agent-hub/pi-mono loaded Agent Hub.html#pi-mono and displayed Pi-mono READ-ONLY.
- /gateway/agent-hub/openclaw-plus loaded Agent Hub.html#openclaw-plus and displayed OpenClaw+ BLOCKED with openclaw_doctor_runtime_not_reachable.
- No "Design only - no production calls" notice was present.
- No OpenCloud architecture label was present.
- No raw filesystem path was observed.

Safety Confirmation

- No .env changes.
- No secrets printed.
- No auth weakening.
- No fake Done.
- No fake GO.
- No connector write.
- No Zapier write.
- No SMB/Fork 2.
- No HeyGen.
- No external farmer.
- No new public local exposure.

Remaining Blocker

Blocker: owner_authenticated_agent_detail_pages_retest_required

Blocker class: OWNER_GATED

Reason: developer-side implementation and proof are complete, but final acceptance requires the owner to view the deployed authenticated UI and confirm the detail routes match expectations in the real browser session.

Commit And Push

Code commit: 20a981fa48f5a41c05971b0a7c3d14af93d5fc9e

Push result: pushed to origin/to-knowledge-mc.

Report commit: pending.

Rollback command:

```
““bash  
git revert 20a981fa48f5a41c05971b0a7c3d14af93d5fc9e  
““
```

Next Day Started

Day 20 - No-Fake-Button Sweep has automatically started.
