

Day 2 - Bridge Session Execution Proof Report

Objective

Prove one safe scoped Bridge Session execution path if an active owner-approved session exists; otherwise confirm the exact blocker while proving protected actions remain blocked outside scope.

Result

****PARTIAL / GATED.**** Bridge Session persistence and the approval contract are present, and a pending owner approval already exists. No active Bridge Session is available, so no scoped execution was run.

Exact blocker: `active\_bridge\_session\_required`.

Updated Percentage

System	Previous	Current	Decision
Bridge Session	68%	70%	PARTIAL / GATED
Protected execution gating	80%	82%	PASS, blocked without active session
Live scoped execution proof	0%	0%	BLOCKED by pending owner approval

Actions

Action	Result
Checked Bridge Session status	PASS
Confirmed persistence	PASS
Confirmed one pending approval exists	PASS
Created duplicate approval prompt	No
Ran external write or broad connector action	No
Attempted safe audit/action proof	Blocked with `active_bridge_session_required`
Confirmed unauthenticated Bridge routes	HTTP 401
Confirmed outside-scope actions remain blocked	PASS

Commands And Routes Used

Command / Route	Purpose	Result
`GET /api/bridge/agent-zero/bridge-session`	authenticated	Read Bridge Session state HTTP 200
`GET /api/bridge/agent-zero/bridge-session`	unauthenticated	Auth protection HTTP 401
`POST /api/bridge/agent-zero/bridge-session`	unauthenticated	Auth protection HTTP 401
`POST /api/bridge/agent-zero/bridge-session/audit`	authenticated	Attempt safe scoped action audit HTTP 423, blocked

Proof

Bridge Session status:

Field	Value
`ok`	true
mode	`agent_zero_bridge_session_status`
persistence ready	true
execution enabled	false

```
| writes enabled | false |
| session status | `pending_approval` |
| approval request present | yes |
| blocked scopes | 10 |
| next action | Owner approval is already pending; reuse request and do not create another prompt |
```

Safe action audit attempt:

```
| Field | Value |
| --- | --- |
| HTTP status | 423 |
| `ok` | false |
| mode | `agent_zero_bridge_session_action_blocked` |
| execution enabled | false |
| accepted for execution | false |
| blocked reason | `active_bridge_session_required` |
| session status | `pending_approval` |
| session blocked reason | `owner_approval_pending` |
| no approval spam | true |
```

Files Changed

```
| File | Change |
| --- | --- |
| `runtime/day-02-bridge-session-execution-proof-report.md` | Added this report |
| `runtime/day-02-bridge-session-execution-proof-report.pdf` | Generated PDF report |
```

No application code was changed in this phase.

Tests

```
| Test | Result |
| --- | --- |
| Authenticated Bridge Session status | PASS |
| Unauthenticated status route | PASS, HTTP 401 |
| Unauthenticated session open route | PASS, HTTP 401 |
| Safe action without active session | PASS, blocked with `active_bridge_session_required` |
| Duplicate approval spam prevention | PASS |
| External write check | PASS, no write attempted |
| Secret exposure check | PASS |
| `.env` modification check | PASS |
```

Services

```
| Service | State |
| --- | --- |
| Mission Control | Active |
| Bridge Session persistence | Ready |
| Owner approval state | Pending |
```

Blockers

```
| Blocker | Impact | Exact Next Step |
| --- | --- | --- |
| `active_bridge_session_required` | Cannot execute or audit a real scoped action as completed | Owner must approve the pending Agent Zero Bridge Session request through the canonical owner approval channel |
| `owner_approval_pending` | Session exists but execution/writes remain disabled |
```

| Wait for owner approval; do not create duplicate prompts |

Rollback

No code or external action changed in this phase. A safe blocked audit attempt was performed and no execution occurred. If this report needs removal, revert the report-only commit that adds it.

No-Secrets Confirmation

No tokens, API keys, auth files, approval secrets, or `.env` values were printed or committed.

Final Decision

Bridge Session remains ****PARTIAL / GATED****. The gate is working: protected actions stay blocked until the pending owner approval becomes an active scoped Bridge Session.
