

Day 2 - YouTube Transcript Proof Report

Objective

Prove whether SpaceAgent can perform public YouTube metadata/transcript research through Mission Control without downloading full video, bypassing platform restrictions, exposing secrets, or making writes.

Result

****PARTIAL / LIMITED.**** Mission Control has a YouTube research packet model and a protected SpaceAgent route, but a live transcript connector was not proven. The production route returned a blocked ResearchPacket for the tested YouTube request instead of transcript-backed claims.

The exact remaining blocker is `youtube\_transcript\_connector\_not\_proven`.

Updated Percentage

System	Previous	Current	Decision
YouTube Research	55-72%	58%	LIMITED, transcript connector not proven
SpaceAgent YouTube path	60%	62%	Protected route and packet/blocker behavior proven
Gateway YouTube policy	75%	75%	Read-only/gated policy is visible and enforced

Actions

Action	Result
Used public YouTube URL	Yes
Downloaded full video	No
Bypassed login, age, region, copyright, or paywall restriction	No
Checked SpaceAgent status route	PASS
Checked Gateway SpaceAgent research route	PASS for guarded blocker behavior
Extracted transcript-backed claims	No, connector not proven
Printed secrets or auth files	No
Modified `.env`	No

Commands And Routes Used

Command / Route	Purpose	Result
`GET /api/bridge/space-agent/status`	Check SpaceAgent YouTube support flags	HTTP 200
`POST /api/gateway/space-agent/research`	Submit public YouTube inspection request	HTTP 423 guarded blocked packet
`GET /api/gateway/space-agent/browser/status`	Confirm SpaceAgent browser status remains readable	HTTP 200
`GET /api/viral-crawl/video/status`	Check related video intelligence status only	HTTP 200, read-only status

Proof

Authenticated SpaceAgent status exposed:

Field	Value
`ok`	true
YouTube support	metadata / description / transcript / chapters / key claims

```
when available |
| transcript path configured | true |
| runtime adapter configured | false |
| execution enabled | false |
```

Authenticated YouTube research request result:

```
| Field | Value |
| --- | --- |
| HTTP status | 423 |
| `ok` | false |
| returned packet | yes |
| packet status | blocked |
| policy decision | blocked |
| blocked reason | `copyrighted_video_download_blocked_by_default` |
| transcript-backed claims returned | no |
| external write | no |
| secrets exposed | no |
| raw paths exposed | no |
```

The packet correctly preserved the Gateway chain:

```
| Chain Item | Value |
| --- | --- |
| Dispatcher | Pi |
| Commander / supervisor | Agent Zero |
| Research specialist | SpaceAgent |
| Return route | SpaceAgent to Gateway to Agent Zero |
| Mode | read-only research packet |
```

Files Changed

```
| File | Change |
| --- | --- |
| `runtime/day-02-youtube-transcript-proof-report.md` | Added this report |
| `runtime/day-02-youtube-transcript-proof-report.pdf` | Generated PDF report |
```

No application code was changed in this phase.

Tests

```
| Test | Result |
| --- | --- |
| Authenticated SpaceAgent status route | PASS |
| Authenticated YouTube research route | PASS for guarded blocker behavior |
| Transcript-backed claim extraction | BLOCKED |
| Full video download prevention | PASS |
| Secret exposure check | PASS |
| `.env` modification check | PASS |
```

Services

```
| Service | State |
| --- | --- |
| Mission Control | Active |
| SpaceAgent | Routed through Mission Control |
| YouTube transcript runtime adapter | Not proven |
| Video intelligence status route | Read-only status available |
```

Blockers

```
| Blocker | Impact | Exact Next Step |
```

| --- | --- | --- |
| `youtube\_transcript\_connector\_not\_proven` | YouTube research cannot be claimed
GO for live transcript extraction | Wire and prove a safe transcript-only adapter
that does not download video or bypass restrictions |
| guarded video request returned `copyrighted\_video\_download\_blocked\_by\_default`
| The tested request produced a correct safety block, not transcript evidence |
Add a connector path that distinguishes transcript/metadata fetch from video do
wnload and returns transcript claims only when available |

Rollback

No code or service behavior changed in this phase. Rollback is not required. If
this report needs removal, revert the report-only commit that adds it.

No-Secrets Confirmation

No YouTube credentials, cookies, auth files, API keys, or `.env` values were pri
nted or committed.

Final Decision

YouTube Research remains ****PARTIAL / LIMITED****, not GO. Mission Control can rout
e and block YouTube research honestly, but it cannot yet prove live transcript-b
acked extraction.
