Day 67 â Secret Scan Closure

Date: 2026-05-11

Lane: Runtime / security gate

Status: PASS

Blocker class: NONE

Scope

Day 67 adds and runs a reusable secret-scan closure harness for Mission Control. The harness reports file names and dispositions only. It does not print matched secret-like values, response bodies, token contents, or protected file contents.

Implementation

Files changed:

- scripts/secret-scan-contract.mjs
- src/lib/secret-scan-contract.test.ts
- runtime/day-67-secret-scan.json
- runtime/day-67-secret-scan.md
- runtime/day-67-secret-scan.pdf

Scanner Behavior

The scanner checks high-confidence token/private-key patterns across tracked files and untracked non-binary files. Known test fixture files are allowlisted:

- backend-support/src/___tests___/redact.test.ts
- backend-support/src/___tests___/safety.test.ts
- src/lib/___tests___/scan-credentials.test.ts

The scanner also runs the protected-file invariant check and blocks if .env paths are modified or untracked.

Runtime Proof

Command:

```
node scripts/secret-scan-contract.mjs > runtime/day-67-secret-scan.json
```

Result summary:

- ok: true
- blocker_class: NONE
- blockers: []
- tracked_secret_like_files: 3
- untracked_secret_like_files: 0
- unresolved_secret_like_files: 0
- env_status_paths: 0
- protected_changes: 0
- values_printed: false

Tests

Focused test coverage:

- allowlisted fixture classification
- non-allowlisted secret-like file blocks the report
- allowlisted-only scan passes
- .env path change blocks the report

Full validation is recorded in the final closeout after command execution.

Deploy / Restart

No production route/server behavior changed. No deploy or restart is required for this Day 67 security harness.

Security Confirmation

No .env changes.

No secrets printed.

No protected file contents read or printed by the invariant check.

No auth weakening.
No public exposure.
No external writes.

Rollback

After commit, use:

git revert <day-67-commit-sha>

Next Day Started

After Day 67 commit/push, continue automatically to Day 68 â Raw Path / Public Exposure Sweep 10
0% Closure.
