

Gateway UI Owner Retest Final Report (Awaiting Owner Confirmation)

Objective

Deploy the Gateway FULL v3 UI shell fixes and prepare owner re-test for final visual decision.

Implemented

1. Fixed mock shell row sizing mismatch in 'shared/tokens.css':
 - '.gw-shell' now explicitly models topbar + tab rail + content row.
2. Simplified route mount wrapper to avoid extra iframe-shell drift:
 - '/src/components/gateway/DesignerGatewayMockFrame.tsx'
3. Kept FULL v3 mounted HTML route structure intact.
4. Added/kept owner-safe copy cleanup on mounted pages (no active Tony/OpenCloud wording in active surfaces).

Commit Lineage

- '46d386a' â 'fix(gateway-ui): remove scroll traps and align mounted designer surfaces'
- '8093307' â 'fix(deploy): make standalone probe portable across macOS bash/sed/awk'

Validation

- 'git diff --check' passed.
- 'pnpm run typecheck' passed.
- 'pnpm run build' passed.
- 'pnpm test' passed ('138 files / 1251 tests').
- Protected-file invariant scan passed.
- '.env' diff remains clean.

Deployment

- Standalone deploy script now completes successfully with committed head:
 - deployed commit: '8093307'
 - probe asset verified from '/login' render

Auth-Protection Smoke (Unauthenticated)

All listed routes return '307 -> /login' as expected:

- '/gateway'
- '/gateway/routes'
- '/gateway/registry'
- '/gateway/policies'
- '/gateway/health'
- '/gateway/dispatcher'
- '/gateway/token-governor'
- '/gateway/agent-hub'
- '/gateway/agent-hub/paperclip'
- '/gateway/bridge-session'
- '/gateway/node-detail'
- '/gateway/mobile-tablet'
- '/agent-network'
- '/agents'

Current Decision

- Gateway owner visual lane: ****PARTIAL GO****
- Reason: owner-authenticated re-test still required for final GO.

Active Blocker

- 'gateway_ui_design_fidelity_scroll_defect' remains open until owner confirms:
 1. normal scroll behavior in '/gateway/agent-hub'
 2. no trapped/blank-frame feel
 3. exits/navigation feel correct in authenticated runtime
 4. FULL v3 visual fidelity is acceptable

No-Secrets Confirmation

- No secrets printed.
- No auth files printed.

- No '.env' changes.
- No auth weakening.

Next Step

Owner re-test in authenticated production browser using:

- '/gateway'
- '/gateway/agent-hub'
- '/gateway/agent-hub/paperclip'
- '/agent-network' and '/agents' alias paths.
