

Gateway Pattern A Drop-In Correction

Date: 2026-05-10

Status: IMPLEMENTED - owner retest still required before GO

Branch: to-knowledge-mc

Objective

Correct the Gateway FULL v3 integration so the designer mock remains the production UI contract.

Root Cause

The live Gateway leaf routes were implemented as Next page wrappers that mounted the designer pages inside a React/Next page frame. That created visual drift, wrapper chrome, and scroll/container behavior that did not match the designer mock.

Designer Decision Applied

Pattern A was applied:

- '/gateway' is the only Next Gateway surface.
- '/gateway' redirects into the static designer Mission Control shell with 'page=gateway'.
- Gateway sub-pages are internal GatewayShell tabs.
- Legacy leaf URLs redirect to '/gateway?tab=...'.
- GatewayShell loads raw static mock HTML via iframe from absolute same-origin static asset paths.
- Mock HTML, mock CSS, shared tokens, and class names were not edited.

Files Changed

- 'next.config.js'
- 'public/designer-mission-control/src/gateway/GatewayShell.jsx'
- 'public/designer-mission-control/src/app.jsx'
- 'src/app/gateway/page.tsx'
- 'src/app/agents/route.ts'
- 'src/app/[...panel]/route.ts'
- 'src/lib/navigation.ts'
- 'src/lib/gateway-cloudcode-integration.ts'
- Gateway/navigation tests

Routes Changed

- '/gateway' -> '/designer-mission-control/Mission%20Control.html?page=gateway'
- '/gateway/agent-hub' -> '/gateway?tab=agent-hub'
- '/gateway/agent-hub/paperclip' -> '/gateway?tab=paperclip'
- '/gateway/routes' -> '/gateway?tab=routes'
- '/gateway/registry' -> '/gateway?tab=registry'
- '/gateway/policies' -> '/gateway?tab=policies'
- '/gateway/health' -> '/gateway?tab=health'
- '/gateway/dispatcher' -> '/gateway?tab=dispatcher'
- '/gateway/token-governor' -> '/gateway?tab=governor'
- '/gateway/bridge-session' -> '/gateway?tab=bridge'
- '/gateway/node-detail' -> '/gateway?tab=node-detail'
- '/gateway/mobile-tablet' -> '/gateway?tab=mobile'

Deleted Wrapper Pages

The following Next wrappers were removed so they cannot re-render or reinterpret the mocks:

- 'src/app/gateway/routes/page.tsx'
- 'src/app/gateway/registry/page.tsx'
- 'src/app/gateway/policies/page.tsx'

- 'src/app/gateway/health/page.tsx'
- 'src/app/gateway/dispatcher/page.tsx'
- 'src/app/gateway/token-governor/page.tsx'
- 'src/app/gateway/agent-hub/page.tsx'
- 'src/app/gateway/agent-hub/paperclip/page.tsx'
- 'src/app/gateway/agent-hub/[id]/page.tsx'
- 'src/app/gateway/bridge-session/page.tsx'
- 'src/app/gateway/node-detail/page.tsx'
- 'src/app/gateway/mobile-tablet/page.tsx'

Data Truth

'shared/agent-data.js' remains the data-wiring file for Agent Hub. It reads '/api/gateway/agent-hub/status' and maps live/gated/blocked states into the designer status grammar. The mock rendering code remains unchanged.

Verification So Far

Focused tests passed:

- 'src/lib/gateway-native-frame-decision.test.ts'
- 'src/lib/mission-control-shell.test.ts'
- 'src/app/gateway-route-alias.test.ts'
- 'src/lib/navigation.test.ts'
- 'src/lib/gateway-cloudcode-integration.test.ts'
- 'src/app/api/gateway/status/route.test.ts'
- 'src/app/api/gateway/navigation/route.test.ts'

Result: 8 files / 34 tests passed.

Full validation run:

- 'git diff --check': passed.
- 'pnpm run typecheck': passed after clearing stale generated '.next/types'.
- 'pnpm run build': passed; deleted Gateway wrapper pages no longer appear as app routes.
- 'pnpm test': passed, 181 files / 1414 tests.
- 'scripts/check-protected-file-invariants.mjs': passed.
- '.env' diff check: no diff.
- 'scripts/check-mission-control-route-rendering.mjs': passed, 46 routes and 8 designer pages checked.

Runtime smoke on '127.0.0.1:3337':

- '/login' returns 200.
- '/gateway' redirects to '/login' when unauthenticated.
- '/gateway/agent-hub' redirects to '/gateway?tab=agent-hub'.
- '/gateway/agent-hub/paperclip' redirects to '/gateway?tab=paperclip'.
- '/gateway/routes' redirects to '/gateway?tab=routes'.
- Designer static assets remain protected when unauthenticated.

Owner Retest Required

Gateway UI is not GO until owner confirms:

- '/gateway' shows the FULL v3 Gateway shell.
- '/gateway?tab=agent-hub' shows the designer Agent Hub mock.
- The owner can navigate through Mission Control rail and Gateway internal tabs.
- Agent Hub scrolls normally.
- No fake buttons, raw paths, secrets, or fake live status are visible.

Blocker Classification

OWNER_GATED: owner visual retest required after deploy/restart.

Rollback

After commit:

```
'git revert <gateway_pattern_a_commit_sha>'
```
