Executive Result

Google Drive and OneDrive delivery are ****PARTIAL GO / BLOCKED****. Gateway can see the delivery surfaces, but uploads are not configured and both upload test routes correctly block without uploading anything.

Production Route Evidence

Surface	Status	Route	Gateway	Node	Upload Test	Result
---	---	---	---	---	---	---
Google Drive	200,	connected=true,	configured=false	200,	read_only	423 blocked: google_drive_upload_connector_not_configured
OneDrive	200,	connected=false,	configured=false	200,	blocked	423 blocked: onedrive_upload_connector_not_configured
Unauthenticated Google Drive status	401	n/a	n/a	n/a	protected	

Upload Safety

Check	Result
---	---
Google uploaded file	false
OneDrive uploaded file	false
Accepted for execution	false
Execution enabled	false
Bridge Session required	yes
External write occurred	no

Remaining Blockers

Blocker	Impact	Exact Next Step
---	---	---
google_drive_upload_connector_not_configured	Google Drive upload cannot be marked live.	Configure approved upload connector and run scoped Bridge Session upload test.
onedrive_upload_connector_not_configured	OneDrive upload cannot be marked live.	Configure approved OneDrive connector and run scoped Bridge Session upload test.
onedrive_not_visible_or_configured	OneDrive Gateway node remains blocked.	Complete OneDrive connector setup and folder lookup proof.

Security Confirmation

- No file was uploaded.
- No external write occurred.
- No credentials were printed.
- No .env changes were made.

- Protected route blocked unauthenticated access.

Completion Estimate

Component	Percent	Status
---	---	---
Google Drive status visibility	60%	visible but upload blocked
Google Drive upload	0%	connector missing
OneDrive status visibility	35%	node present but blocked
OneDrive upload	0%	connector missing
Delivery policy blocking	90%	uploads correctly blocked
Drive/OneDrive overall	32%	BLOCKED/PARTIAL

Final Decision

Drive/OneDrive delivery: ****PARTIAL GO for visibility, NO-GO for upload delivery****.

The routes are safe and honest. Real delivery requires configured connectors and a scoped Bridge Session.
