Day 98 - Owner Authenticated Proof Packet 100% Closure

- Lane: Owner authenticated proof packet
- Status: DEVELOPER-SIDE CLOSED WITH OWNER_GATED AUTHENTICATED VISUAL CAPTURE
- Day 98 blocker classification: OWNER_GATED
- Started from commit: 80c1462d14169de49187a35141cbe22fbc18e58d
- Closed at: 2026-05-12T06:49:00Z

What Was Implemented

Reused the existing authenticated visual proof harness instead of adding a new UI or modifying designer files. Generated a truthful owner-auth proof packet for the current local-only runtime on '127.0.0.1:3337'.

The packet proves safe unauthenticated protection behavior, static designer asset integrity, and scan cleanliness. It does not claim authenticated screenshots/video because no owner-authenticated browser session or cookie was available.

Files Changed

- runtime/day-98-owner-authenticated-proof-packet/proof-summary.json

No source code, UI, designer HTML, CSS, or class names were changed for Day 98.

Routes / Endpoints Checked

- /login
- /gateway
- /gateway/status
- /design/gateway/Agent Hub.html
- /design/gateway/Paperclip.html
- /api/gateway/status
- /api/gateway/agent-hub/status
- /api/bridge/connector-proof-packet
- /api/bridge/approval-proof-packet

UI Behavior

Authenticated owner screenshots/video were not captured. The proof harness records:

- owner_session_available: false
- owner_visual_proof_claimed: false
- blocker_class: OWNER_GATED
- screenshots: 0

Gateway designer files were verified by hash and source contract only. No mock HTML/CSS/class names were edited or reimplemented.

Service / Runtime Behavior

Day 98 used the Day 97 local-only deployed runtime:

- Base URL: http://127.0.0.1:3337
- Bind: 127.0.0.1 only
- Runtime session: mc-day97
- No public exposure added
- No external writes executed
- No secrets printed
- No '.env' changes

Tests Run

- git diff --check: PASS
- .env diff check: PASS
- Focused proof tests: PASS, 3 files / 12 tests
 - src/lib/authenticated-visual-proof.test.ts
 - src/app/design/gateway/route.test.ts
 - src/lib/runtime-final-closeout-contract.test.ts
- Protected route smoke: PASS
- Authenticated route smoke: PASS with blocker_class OWNER_GATED
- Protected-file invariant scan: PASS
- Secret scan: PASS
- Raw exposure scan: PASS

Deploy / Restart / Smoke Result

No new deploy or restart was required for Day 98. The proof packet used the live local-only Day 97 runtime. Route protection probes and smoke contracts ran against 'http://127.0.0.1:3337'.

- runtime/day-98-owner-authenticated-proof-packet/protected-file-invariants.json

Remaining Blocker

OWNER_GATED: authenticated owner screenshots/video require a safe owner-authenticated browser session/cookie. No authenticated owner visual proof is claimed.

Exact Day 98 blocker classification: OWNER_GATED.

Rollback Command

git revert <day-98-owner-authenticated-proof-packet-commit>

Commit / Push

- Commit hash: pending at report creation
- Push result: pending at report creation

Next Day

Day 99 - Final Blocker Elimination starts automatically after this Day 98 commit and push.
