

Day 7 Phase 062 - Brain Write Bridge Proof

Generated: 2026-05-07 23:56 ET

Objective

Prove Brain writes only if safely scoped, or honestly block them.

Actions

- Checked Brain write contract through Brain Sync status.
- Verified Obsidian, MemPalace, Graphify, and Build-Wiki write gates.
- Did not perform a write because no active scoped Bridge Session was available for Day 7.

Proof

Write Target	State	Blocker	Safety Result
---	---	---	---
Obsidian	blocked	active_bridge_session_required_for_brain_write	No write executed
MemPalace	blocked	active_bridge_session_required_for_brain_write	No memory write executed
Graphify	blocked	active_bridge_session_required_for_brain_write	No graph write/rebuild executed
Build-Wiki / Farmer	blocked	buildwiki_run_now_requires_bridge_session	No farmer manual run executed

Decision

PARTIAL GO / gated. Read visibility is proven; write proof remains blocked by missing active Bridge Session scope.
