

day-69-rollback-plan

Day 69 â Rollback Plan Per Lane Closure

Date: 2026-05-11

Lane: Runtime / rollback coverage

Status: PASS

Blocker class: NONE

Scope

Day 69 creates a rollback-plan contract for the main Mission Control / Gateway closure lanes and checks recent daily closeout reports for explicit rollback guidance. The checker reports paths and dispositions only; it does not print sensitive report contents.

Implementation

Files changed:

- scripts/rollback-plan-contract.mjs
- src/lib/rollback-plan-contract.test.ts
- runtime/day-69-rollback-plan.json
- runtime/day-69-rollback-plan.md
- runtime/day-69-rollback-plan.pdf

Covered Core Lanes

The rollback matrix covers 15 primary lanes:

- Mission Control
- Gateway / Agent Hub
- Agent Zero
- Hermes
- Pi
- SpaceAgent
- Paperclip
- OpenClaw+
- Bridge Session
- Build-Wiki / Farmer
- Delivery connectors
- Brain
- Runtime / deployment
- Security
- UX

Proof

Command:

node scripts/rollback-plan-contract.mjs > runtime/day-69-rollback-plan.json

Result summary:

- ok: true
- blocker_class: NONE
- core_lanes: 15
- closeout_files_checked: 6
- missing_rollback_reports: 0
- rollback_values_printed: false

Tests

Focused tests cover:

- primary lane matrix completeness
- closeout text with rollback command passes
- closeout text without rollback guidance fails
- report blocks when any closeout lacks rollback guidance
- report passes when checked closeouts include rollback guidance

Full validation is recorded in the final closeout after command execution.

Deploy / Restart

No production route/server behavior changed. No deploy or restart is required for this Day 69 ro

llback harness.

Security Confirmation

No .env changes.

No secrets printed.

No auth weakening.

No public exposure added.

No external writes.

Rollback

After commit, use:

git revert <day-69-commit-sha>

Next Day Started

After Day 69 commit/push, continue automatically to Day 70 â Monitoring / Failure States 100% Closure.
