

Day 07 Phase 3 â Telegram PDF Live Attachment Proof

Objective

Use the implemented Telegram adapter path and determine whether live PDF attachment can execute now.

Result

GATED/BLOCKED (honest, no fake send).

Actions Executed

1. Authenticated as operator.
2. Created a fresh Agent Zero report (Markdown + PDF artifact available in Mission Control).
3. Checked Telegram adapter status:
 - 'GET /api/bridge/agent-zero/telegram/status'
4. Attempted upload route:
 - 'POST /api/bridge/agent-zero/telegram/upload-report'
5. Confirmed result payload and blocked reason.

Route Evidence

- Evidence file:
 - 'runtime/day-07-phase-3-telegram-proof.json'
- Results:
 - report create -> '201'
 - telegram status -> '200'
 - telegram upload -> '423' (blocked)

Live-Truth Outcome

- Adapter route exists and responds correctly.
- Real attachment send did **not** execute.
- 'accepted_for_execution' remained 'false'.
- 'telegram_message_id' remained 'null'.
- No fake delivery claim was made.

Exact Blockers

- 'owner_approval_pending'
- 'telegram_report_delivery_adapter_not_configured'
 - missing config flags in status payload:
 - 'TELEGRAM_BOT_TOKEN'
 - 'AGENT_ZERO_OWNER_TELEGRAM_CHAT_ID'

Owner Action Package

To move this to GO:

1. Configure Telegram connector through approved secret path (no tokens shared in chat).
2. Approve active Bridge Session scope for one Telegram PDF send.
3. After that, Codex will rerun upload route and verify:
 - 'status=completed'
 - 'accepted_for_execution=true'
 - non-null 'telegram_message_id'
 - matching audit event

Files Changed

- 'runtime/day-07-phase-3-telegram-pdf-live-proof.md'
- 'runtime/day-07-phase-3-telegram-pdf-live-proof.pdf'
- 'runtime/day-07-phase-3-telegram-proof.json'

Tests

- Focused API/runtime smoke for Telegram flow in this phase.

Services

- Mission Control runtime active on '127.0.0.1:3337'.

Commits

- No source commit in this phase (verification + reporting).

Rollback

- Not applicable (no source mutation).

No-Secrets Confirmation

- No bot token printed.
- No credential file contents printed.
- No raw local path exposed in API output captured.

Updated Percentage

- Telegram remains PARTIAL/GATED.
- Not GO until real attachment send succeeds.

Exact Next Step

Proceed to Day 07 Phase 4 (Paperclip owner session proof) and publish owner-action package if owner session is unavailable.
