

Day 07 Phase 4 â Paperclip Owner Login / Session Proof

Objective

Move Paperclip beyond health/status-only and verify owner-session-backed read-only data routes.

Result

BLOCKED (service/runtime blocker reached before owner-session step).

Current Truth

- Paperclip bridge status route responds.
- Paperclip sandbox upstream is not running/reachable at loopback endpoint.
- Companies/agents/issues routes remain blocked with '503'.
- Owner login/session proof cannot proceed until sandbox service is available.

Actions Executed

1. Authenticated to Mission Control operator session.
2. Ran Paperclip bridge probes:
 - 'GET /api/bridge/paperclip/status'
 - 'GET /api/bridge/paperclip/companies'
 - 'GET /api/bridge/paperclip/agents'
 - 'GET /api/bridge/paperclip/issues'
3. Verified local Paperclip listener availability on port '3100'.

Route/Runtime Evidence

- Evidence file:
 - 'runtime/day-07-phase-4-paperclip-proof.json'
- Endpoint results:
 - status route -> '200' with degraded state
 - companies -> '503'
 - agents -> '503'
 - issues -> '503'
- Status payload blocker:
 - 'paperclip_sandbox_service_not_running'
- Local listener check:
 - no process listening on '127.0.0.1:3100'

Exact Blockers

1. 'paperclip_sandbox_service_not_running'
2. 'paperclip_owner_session_required' (still applicable after service recovery for owner-dashboa
rd proof)

Owner/Admin Action Package

Required before Paperclip GO proof can continue:

1. Start Paperclip local/Tailnet service on approved endpoint ('127.0.0.1:3100' or approved Tail
net-only endpoint).
2. Keep Paperclip non-public.
3. Confirm owner login path is available in Paperclip UI.
4. Notify Codex once service is running and owner session is ready.

Codex verification immediately after unblock:

1. Re-run status/companies/agents/issues routes.
2. Confirm read-only data loads.
3. Capture owner dashboard/roster/task-queue proof.
4. Keep writes blocked unless Bridge Session + scoped adapter approval is active.

Files Changed

- 'runtime/day-07-phase-4-paperclip-owner-session-proof.md'
- 'runtime/day-07-phase-4-paperclip-owner-session-proof.pdf'
- 'runtime/day-07-phase-4-paperclip-proof.json'

Tests

- Focused Paperclip runtime/route smoke in this phase.

Services

- Mission Control runtime active.
- Paperclip sandbox upstream inactive at expected local endpoint.

Commits

- No source commit in this phase (verification + reporting).

Rollback

- Not applicable (no source mutation).

No-Secrets Confirmation

- No credentials, tokens, or auth files printed.
- No raw paths exposed in owner-facing responses.

Updated Percentage

- Paperclip remains PARTIAL/BLOCKED until sandbox service and owner session proof are both available.

Exact Next Step

Proceed to Day 07 Phase 5 (Drive/OneDrive adapter implementation proof) while Paperclip service/start + owner session are pending.
