

Day 07 Phase 5 â Google Drive / OneDrive Upload Adapter Implementation

Objective

Move Drive/OneDrive from generic blocked status to concrete implemented-route proof with exact blockers.

Result

PARTIAL PASS (provider-specific adapter routes are implemented and safely gated; live uploads remain blocked by connector auth/config).

Actions Executed

1. Authenticated to Mission Control operator session.
2. Created a fresh Agent Zero report artifact for upload testing.
3. Probed provider-specific status routes:
 - 'GET /api/bridge/agent-zero/google-drive/status'
 - 'GET /api/bridge/agent-zero/onedrive/status'
4. Probed upload routes with report id:
 - 'POST /api/bridge/agent-zero/google-drive/upload-report'
 - 'POST /api/bridge/agent-zero/onedrive/upload-report'
5. Verified responses enforce:
 - Bridge Session requirement
 - owner approval requirement
 - provider-specific blocked reasons
 - no fake upload claims
 - no token leakage

Route/Adapter Proof

- Evidence file:
 - 'runtime/day-07-phase-5-drive-onedrive-proof.json'
- Status routes:
 - Google Drive status -> '200' ('blocked', provider-specific step matrix present)
 - OneDrive status -> '200' ('blocked', provider-specific step matrix present)
- Upload routes:
 - Google Drive upload -> '423', 'accepted_for_execution=false', blocker 'google_drive_upload_connector_not_configured'
 - OneDrive upload -> '423', 'accepted_for_execution=false', blocker 'onedrive_upload_connector_not_configured'

What Is Implemented

- Distinct provider routes exist and are wired:
 - Google Drive:
 - '/api/bridge/agent-zero/google-drive/status'
 - '/api/bridge/agent-zero/google-drive/folder-lookup'
 - '/api/bridge/agent-zero/google-drive/upload-test-file'
 - '/api/bridge/agent-zero/google-drive/upload-report'
 - '/api/bridge/agent-zero/google-drive/verify-link'
 - OneDrive:
 - '/api/bridge/agent-zero/onedrive/status'
 - '/api/bridge/agent-zero/onedrive/folder-lookup'
 - '/api/bridge/agent-zero/onedrive/upload-test-file'
 - '/api/bridge/agent-zero/onedrive/upload-report'
 - '/api/bridge/agent-zero/onedrive/verify-link'
- Provider separation is preserved (no merged fake abstraction).

Exact Blockers

- 'google_drive_upload_connector_not_configured'
- 'onedrive_upload_connector_not_configured'

Owner OAuth / Connector Action Package

To progress from blocked to GO:

1. Complete approved OAuth/connector setup for Google Drive and OneDrive via the sanctioned integration path.

2. Keep tokens in secret store only (no token sharing in chat/reports).
3. Approve a scoped Bridge Session for one upload test per provider.
4. Codex will then verify:
 - successful upload response,
 - safe link returned,
 - audit record,
 - out-of-scope writes still blocked.

Files Changed

- 'runtime/day-07-phase-5-drive-onedrive-upload-adapter-implementation.md'
- 'runtime/day-07-phase-5-drive-onedrive-upload-adapter-implementation.pdf'
- 'runtime/day-07-phase-5-drive-onedrive-proof.json'

Tests

- Focused adapter route smoke performed in this phase.
- Full suite not rerun in this phase.

Services

- Mission Control runtime active on '127.0.0.1:3337'.

Commits

- No source commit in this phase (verification + reporting).

Rollback

- Not applicable (no source mutation).

No-Secrets Confirmation

- No OAuth token values printed.
- No credential files printed.
- No raw local paths exposed in captured owner-facing payloads.

Updated Percentage

- Drive/OneDrive readiness increased for implementation clarity and safe gating.
- GO remains blocked until real uploads succeed.

Exact Next Step

Proceed to Day 07 Phase 6 (AgentMail incoming/outgoing proof).
