Day 07 Phase 6 â AgentMail Incoming/Outgoing Proof

Objective

Move AgentMail from vague/gated state to exact route-level proof.

Result

PARTIAL/BLOCKED (adapter visibility proven; live send still blocked).

Actions Executed

1. Authenticated to Mission Control operator session.
2. Read execution adapter registry:
 - 'GET /api/bridge/agent-zero/execute'
3. Attempted AgentMail send through registered execution adapter:
 - 'POST /api/bridge/agent-zero/execute' with 'action=agentmail.send'
4. Captured blocked reasons and safety contract fields.

Evidence

- Evidence file:
 - 'runtime/day-07-phase-6-agentmail-proof.json'
- Results:
 - adapter registry fetch -> '200'
 - AgentMail execution attempt -> '423' (blocked)

Verified Behavior

- AgentMail adapter is present in execution registry ('agentmail.send').
- Adapter is currently blocked and does not fake completion.
- Send attempt was rejected safely:
 - 'accepted_for_execution=false'
 - Bridge Session still pending approval
 - no external email sent
 - no token leakage

Exact Blockers

1. 'active_bridge_session_required'
2. 'owner_approval_pending'
3. 'agentmail_send_connector_not_configured'

Additional constraint status:

- Allowed-domain send cannot be proven until connector + approved Bridge Session are both active
- .

Owner/Admin Action Package

To progress AgentMail:

1. Configure AgentMail send connector through approved secret path.
2. Keep send scope restricted to domain allow-list.
3. Approve scoped Bridge Session for one allowed-domain test send.
4. Codex will verify:
 - execution accepted,
 - one allowed-domain send success,
 - audit event,
 - out-of-scope/non-allowlisted send still blocked.

Files Changed

- 'runtime/day-07-phase-6-agentmail-status-send-proof.md'
- 'runtime/day-07-phase-6-agentmail-status-send-proof.pdf'
- 'runtime/day-07-phase-6-agentmail-proof.json'

Tests

- Focused adapter/execution route smoke for AgentMail in this phase.

Services

- Mission Control runtime active on '127.0.0.1:3337'.

Commits

- No source commit in this phase (verification + reporting).

Rollback

- Not applicable (no source mutation).

No-Secrets Confirmation

- No API key/token values printed.
- No auth files printed.

Updated Percentage

- AgentMail remains PARTIAL/BLOCKED pending connector config + approved scoped execution.

Exact Next Step

Proceed to Day 07 Phase 7 (YouTube live transcript proof).
