

Day 07 Phase 8 â OpenClaw+ Doctor Issue Reduction

Objective

Run authenticated OpenClaw+ doctor, reduce safe issues where possible, and capture exact remaining blockers.

Result

BLOCKED (doctor runtime not reachable in current runtime environment).

Actions Executed

1. Authenticated to Mission Control operator session.
2. Ran:
 - 'GET /api/openclaw/doctor'
3. Ran:
 - 'GET /api/security-scan'
4. Extracted current failing/warning scan items for runbook follow-up.

Evidence

- Evidence file:
 - 'runtime/day-07-phase-8-openclaw-proof.json'
- OpenClaw+ doctor result:
 - HTTP '400'
 - error: 'OpenClaw is not installed or not reachable'
- Security scan result:
 - HTTP '200'
 - overall: 'needs-attention'
 - score: '63'

Exact Blocker

- 'openclaw_doctor_runtime_not_reachable'

Safe-Fix Outcome

- No destructive or governance-changing operations were attempted.
- No '.env' modification was made.
- No agents/skills/memory/reports were deleted.
- Because doctor runtime was unreachable, no doctor issue reduction was possible in this phase.

Security Follow-up Snapshot

Current non-pass checks captured in this environment include:

- 'auth_pass' (fail)
- 'allowed_hosts' (warn)
- 'hsts_enabled' (warn)
- 'cookie_secure' (warn)
- 'config_found' (warn)
- 'backup_recent' (warn)
- 'receipt_signing' (warn)
- 'ntp_sync' (warn)
- 'open_ports' (fail)
- 'auto_updates' (warn)
- 'macos_stealth_mode' (warn)
- 'macos_remote_login' (warn)

Owner/Admin Action Package

To continue OpenClaw+ issue reduction:

1. Ensure OpenClaw+ runtime/CLI is installed and reachable from Mission Control runtime host.
2. Confirm doctor command path is available to the running service account.
3. Re-run '/api/openclaw/doctor' in authenticated context.
4. Then apply only safe app-level remediations; keep host-level hardening in admin runbook.

Files Changed

- 'runtime/day-07-phase-8-openclaw-doctor-issue-reduction.md'
- 'runtime/day-07-phase-8-openclaw-doctor-issue-reduction.pdf'

- 'runtime/day-07-phase-8-openclaw-proof.json'

Tests

- Focused authenticated route checks in this phase.

Services

- Mission Control runtime active.
- OpenClaw+ runtime unreachable from current host/runtime context.

Commits

- No source commit in this phase (verification + reporting).

Rollback

- Not applicable (no source mutation).

No-Secrets Confirmation

- No secret values printed.
- No auth files printed.

Updated Percentage

- OpenClaw+ remains PARTIAL/BLOCKED in this environment until doctor reachability is restored.

Exact Next Step

Proceed to Day 07 Phase 9 (security scan improvement pass + owner/admin runbook packaging).
