

day-18-agent-hub-ui-100-closure

Day 18 - Agent Hub UI 100% Closure

Date: 2026-05-09

Branch: to-knowledge-mc

Lane: Agent Hub UI

Status: DEVELOPER-SIDE CLOSED

Blocker class: OWNER_GATED for authenticated owner visual confirmation

Code commit: 2e721fe

Code rollback: git revert 2e721fe

Scope

Day 18 closes the developer-side Agent Hub UI lane by making the mounted FULL v3 Agent Hub show the full active production roster and truthful control states.

The visual contract remains the designer file:

- public/designer-mission-control/design/gateway/Agent Hub.html
- public/designer-mission-control/design/gateway/shared/agent-data.js
- public/designer-mission-control/design/gateway/shared/tokens.css
- public/designer-mission-control/design/gateway/shared/node-card.css

The implementation preserves the designer card/grid/tab classes and status grammar. It does not replace the page with a custom React interpretation.

Inventory Findings

The protected Agent Hub API already returned the canonical six-agent production roster:

- Paperclip
- Agent Zero
- Hermes
- SpaceAgent
- Pi-mono
- OpenClaw+

The mounted designer data still had only five cards, so live Agent Hub hydration silently dropped 'openclaw-plus'. This left the owner-facing Agent Hub incomplete even though '/api/gateway/agent-hub/status' had the right backend truth.

The mounted Agent Hub also had inert action buttons:

- Open localhost
- Send command
- Pause queue
- Bridge Session
- Restart
- Audit

Those buttons were visually present but not classified as live, gated, or disabled with an exact reason.

Implementation

Files changed:

- public/designer-mission-control/design/gateway/Agent Hub.html
- public/designer-mission-control/design/gateway/shared/agent-data.js
- src/lib/gateway-agent-hub-designer-data.test.ts

Changes made:

- Added OpenClaw+ to the designer Agent Hub data roster.
- Kept Paperclip before OpenClaw+.
- Updated Agent Hub static chrome from five agents to six agents.
- Added the OpenClaw+ tab using existing tab/card/glyph styling.
- Added OpenClaw+ fallback state:
 - status: red / blocked
 - blocker: 'openclaw_doctor_runtime_not_reachable'
 - role: Runtime / Skills / Mini-Agent Execution Layer
- Updated live hydration so '/api/gateway/agent-hub/status' can hydrate OpenClaw+ instead of dropping it.
- Added audit route metadata from live Agent Hub routes.
- Converted inert action buttons into truthful states:
 - Open localhost is disabled until localhost/Tailnet UI proof exists.
 - Send command is disabled with scoped Bridge Session + adapter requirement.
 - Pause queue is disabled with Bridge Session + service adapter requirement.
 - Bridge Session is disabled here with pointer to the dedicated flow.
 - Restart is disabled here with owner approval + adapter proof requirement.
 - Audit is a live protected route link.
- Removed the false owner-facing phrase 'Design only â no production calls'.

No '.env', auth, governance, memory, Tony routing, or connector execution behavior was changed.

Route And API Behavior

No new routes were added.

Existing protected routes used:

- '/gateway/agent-hub'
- '/api/gateway/agent-hub/status'
- '/api/gateway/agent-hub/agents/:id/audit'
- '/api/gateway/agent-hub/agents/:id/health'

The live Agent Hub API proof returned:

- ok: true
- agents_total: 6
- ids:
 - paperclip
 - agent-zero
 - hermes
 - spaceagent
 - pi-mono
 - openclaw-plus
- OpenClaw+:
 - status: blocked
 - blocked_reason: openclaw_doctor_runtime_not_reachable
 - writes_enabled: false
 - execution_enabled: false
 - requires_bridge_session: true

UI Behavior

The mounted Agent Hub now renders six production cards:

- Paperclip
- Agent Zero
- Hermes
- SpaceAgent
- Pi-mono
- OpenClaw+

Observed browser proof at 1480x900:

- Summary: '6 agents' • 1 green • 1 yellow • 2 blue • 1 red • 1 gray'
- OpenClaw+ tab is visible.
- OpenClaw+ detail opens.
- OpenClaw+ status is 'BLOCKED'.
- OpenClaw+ detail includes 'openclaw_doctor_runtime_not_reachable'.
- Agent Hub text no longer says 'Design only â no production calls'.
- No 'OpenCloud architecture' label appears.
- Browser proof scroll height: 5027
- Browser proof client height: 4939

Button proof:

- Every card has disabled/gated owner controls with exact reason text.
- Each card's Audit button is live through a protected Agent Hub audit route.
- No send, pause, Bridge Session, restart, localhost, or execution button claims fake action readiness.

Proof artifacts:

- runtime/day-18-agent-hub-local-proof.json
- runtime/day-18-agent-hub-local-proof.png

Tests Run

Fresh validation for Day 18:

- 'pnpm test src/lib/gateway-agent-hub-designer-data.test.ts'
 - passed
 - 1 file
 - 3 tests
- 'pnpm test src/lib/gateway-agent-hub.test.ts src/lib/gateway-agent-hub-designer-data.test.ts'
 - passed
 - 2 files
 - 6 tests
- 'git diff --check'
 - passed
- 'pnpm run typecheck'
 - passed
- 'pnpm run build'
 - passed
 - included 'sync-static-to-standalone'
- 'pnpm test'
 - passed
 - 149 files
 - 1301 tests
- 'node scripts/check-protected-file-invariants.mjs'
 - ok: true
- staged secret scan for code/test files
 - ok: true
- '.env' diff check
 - clean

Runtime Proof

Deployment/restart command:

```
'PORT=3337 MC_HOSTNAME=127.0.0.1 VERIFY_HOST=127.0.0.1 LOG_PATH=/tmp/mc-day18-agent-hub.log BRANCH=to-knowledge-mc bash scripts/deploy-standalone.sh'
```

Deploy script result:

- Previous proof PID stopped: 63786
- Deployed commit reported by script: 2e721fe
- Temporary script PID reported: 73658

- Port: 3337
- Static asset probe: '/_next/static/css/0f8dc0fb86554783.css'

Known runtime note:

- The standalone child exited after readiness again, matching the known local proof-process behavior from prior Gateway closeouts.
- The log showed readiness, auto-generated local runtime credentials, migrations, and scheduler initialization without an explicit runtime error.
- A stable screen-backed local-only proof runtime was restored.

Current proof runtime:

- Bind: 127.0.0.1:3337
- PID: 73934
- Screen session: mc-day18-agent-hub
- Runtime commit under proof: 2e721fe
- Public exposure: none added

Route smoke:

- '/login': 200
- '/gateway': 307 to '/login' when unauthenticated
- '/gateway/agent-hub': 307 to '/login' when unauthenticated
- '/gateway/agent-hub/paperclip': 307 to '/login' when unauthenticated
- '/agents': 307 to '/login' when unauthenticated
- '/agent-network': 307 to '/login' when unauthenticated

Protected action lock:

- 'MISSION_CONTROL_API_KEY=codex-local-route-smoke-key node scripts/check-protected-actions-locked.mjs http://127.0.0.1:3337'
- ok: true
- checked: 11
- protected write/execution actions remain locked or approval-gated.

Browser render proof:

- Browser: local Google Chrome through bundled Playwright package
- Viewport: 1480x900
- Auth method: local proof session cookie plus local route-smoke API header for same-origin API hydration
- Result: Agent Hub rendered six cards and OpenClaw+ detail blocked truthfully.

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No fake GO.
- No fake Done.
- No fake buttons left in Agent Hub cards.
- No raw local paths exposed.
- No custom React redesign.
- No designer token or class rename.
- No SMB/Fork 2.
- No Zapier writes.
- No HeyGen generation.
- No external farmers.
- No Tony routing, voice, memory, or governance changes.
- No parked artifacts staged.

Remaining Blocker

Blocker: owner_authenticated_agent_hub_retest_required

Classification: OWNER_GATED

Owner retest needed:

- Log in to Mission Control.
- Open '/gateway/agent-hub'.
- Confirm six cards are visible:
 - Agent Zero
 - Hermes
 - Pi-mono
 - SpaceAgent
 - Paperclip
 - OpenClaw+
- Confirm OpenClaw+ appears as blocked, not missing or fake-live.
- Confirm buttons are disabled/gated/live-audit with reasons.
- Confirm scroll and Mission Control exits still work.
- Confirm no fake buttons, raw paths, secrets, or OpenCloud architecture label appear.

Closeout Ledger

- Day number and lane: Day 18 - Agent Hub UI
- Status: DEVELOPER-SIDE CLOSED
- Blocker classification: OWNER_GATED
- Code commit hash: 2e721fe
- Push result: pushed to origin/to-knowledge-mc
- Deployed/proof commit: 2e721fe
- Runtime proof: local-only standalone proof on 127.0.0.1:3337
- Current proof PID: 73934
- Rollback command: git revert 2e721fe
- Proof artifacts:
 - runtime/day-18-agent-hub-local-proof.json
 - runtime/day-18-agent-hub-local-proof.png
- Next day automatically started: Day 19 - Agent Detail Pages 100% Closure
