Day 30 â Bridge + Agent Action Integration 100% Closure

Date: 2026-05-09

Lane: Bridge + Agent action integration

Status: CLOSED

Blocker classification: NONE

What Was Implemented

- Routed registered Agent Zero protected adapter actions into the Bridge approval request model when no active Bridge Session exists.
- Added a reusable approval request store helper for protected action request creation.
- The Agent Zero execute route now creates or reuses an exact pending approval request instead of only returning a blocked response.
- The route writes an audit event with outcome 'approval_requested'.
- The route still does not execute the action without an active Bridge Session and owner approval.

Protected behavior added:

- 'accepted_for_execution: false'
- 'execution_enabled: false'
- 'writes_enabled: false'
- 'request_dispatched: false'
- 'approval_state: pending'
- 'blocked_reason: active_bridge_session_required'

Files Changed

- 'src/lib/bridge-approval-request-store.ts'
- 'src/app/api/bridge/agent-zero/execute/route.ts'
- 'src/app/api/bridge/agent-zero/execute/route.test.ts'
- 'runtime/day-30-bridge-agent-action-integration-proof.json'
- 'runtime/day-30-bridge-agent-action-integration-100-closure.md'
- 'runtime/day-30-bridge-agent-action-integration-100-closure.pdf'

Routes / Endpoints Changed

- Updated 'POST /api/bridge/agent-zero/execute'

Behavior:

- Unauthenticated requests remain rejected.
- Registered protected Agent Zero actions blocked by missing Bridge Session create a pending approval request.
- Repeated requests reuse the existing pending request through an idempotency key.
- Unregistered or invalid actions keep the existing blocked behavior.
- No external writes or adapter execution are enabled by this change.

UI Behavior

No direct UI surface changed in this day.

The API response now provides enough state for Mission Control, Gateway, Agent Hub, and Bridge UI to show:

- approval request created
- approval pending
- active Bridge Session required
- no execution dispatched
- exact action scope

Service / Runtime Proof

Local Mission Control standalone runtime:

- Bind: '127.0.0.1:3337'
- PID: '29961'
- '/login': '200'
- Unauthenticated 'POST /api/bridge/agent-zero/execute': '401'
- Authenticated registry 'GET /api/bridge/agent-zero/execute': '200'
- Authenticated 'POST /api/bridge/agent-zero/execute': '423'

Proof action:

- 'mission_control.report.attach'

Proof result:

- 'approval_request_created: true'
- 'approval_request_reused: false'
- 'approval_state: pending'
- 'accepted_for_execution: false'
- 'execution_enabled: false'
- 'writes_enabled: false'
- 'request_dispatched: false'
- 'blocked_reason: active_bridge_session_required'
- approval row found: 'true'
- audit outcomes: 'approval_requested'
- unsafe output detected: 'false'

Proof artifact:

- 'runtime/day-30-bridge-agent-action-integration-proof.json'

Tests Run

- 'pnpm test 'src/app/api/bridge/agent-zero/execute/route.test.ts''
 - PASS: 1 file / 2 tests
- Focused Bridge route tests
 - PASS: 5 files / 22 tests
- 'pnpm run typecheck'
 - PASS
- 'pnpm run build'
 - PASS
- 'pnpm test'
 - PASS: 156 files / 1324 tests
- 'git diff --check'
 - PASS
- 'git diff --cached --check'
 - PASS
- 'node scripts/check-protected-file-invariants.mjs'
 - PASS
- Staged secret/raw-path scan
 - PASS
- '.env' diff check
 - PASS, no '.env' changes

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No Agent Zero protected action executed.
- No connector writes enabled.
- No SMB / Fork 2 / external farmers.
- No Zapier writes.
- No HeyGen generation.
- No fake Done or fake execution state.

Commit / Push

Source commit:

- 'f285db8' â 'feat(bridge): create approvals for agent zero actions'

Report commit:

- this report artifact commit

Push:

- pending report commit and push

Rollback

Source rollback:

```
""bash
git revert f285db8
""
```

Report rollback:

```
""bash
git revert <day30_report_commit_sha>
""
```

Next Day Started

Day 31 â Bridge + Build-Wiki Integration starts automatically after this report is committed and pushed.
