

day-14-navigation-back-100-closure

Day 14 - Mission Control Navigation / Back 100% Closure

Date: 2026-05-10

Branch: to-knowledge-mc

Lane: Mission Control Navigation / Back

Status: DEVELOPER-SIDE CLOSED

Blocker class: OWNER_GATED for authenticated owner navigation/back confirmation

Current source commit: 752b0bc

Prior Day 14 navigation source commit: b7bd95d

Rollback: git revert 752b0bc

Scope

Day 14 closes the developer-side navigation and back-path behavior for Mission Control and Gateway. The earlier Day 14 source work moved Mission Control home/overview exits to live routes, preserved Gateway aliases, and reset scroll on route changes. This refresh consumes the CloudCode route metadata support to cover the mounted Gateway FULL v3 pages that were missing from the normalized navigation contract.

This is not owner visual GO. Authenticated owner retest remains required before the Gateway/Mission Control visual lane can move beyond PARTIAL GO.

Inventory Findings

Navigation surfaces inspected:

- 'src/lib/navigation.ts'
 - Mission Control panel routes already target concrete live routes.
 - 'router.push(href, { scroll: true })' is in place, so route changes reset scroll.
- 'src/app/[...panel]/route.ts'
 - Mission Control home/default panels route to '/tkmc'.
 - Gateway aliases route toward Gateway FULL v3 surfaces.
- 'backend-support/src/route-metadata.ts'
 - CloudCode route metadata powered '/api/gateway/navigation', but it did not cover all mounted Gateway FULL v3 pages.
 - Before this increment, '/api/gateway/navigation?route=/gateway/agent-hub/paperclip' returned '404 ROUTE_MISSING'.
- 'src/app/api/gateway/navigation/route.ts'
 - Uses 'buildCloudCodeNavigation()' and now receives complete mounted-route metadata.

What Was Implemented

Added mounted Gateway FULL v3 route metadata for:

- '/gateway/agent-hub/paperclip'
- '/gateway/agent-hub/:agentId'
- '/gateway/routes'
- '/gateway/registry'
- '/gateway/policies'
- '/gateway/health'
- '/gateway/status'
- '/gateway/brain'
- '/gateway/space-agent'
- '/gateway/node-detail'
- '/gateway/mobile-tablet'

The Paperclip page now resolves as:

- current page: 'Paperclip'
- safe back: '/gateway/agent-hub'
- Gateway overview: '/gateway'
- Agent Hub: '/gateway/agent-hub'

- breadcrumbs: 'Mission Control > Gateway > Agent Hub > Paperclip'

No designer HTML, CSS, shared tokens, class names, or Gateway mock rendering code were changed.

Files Changed

Current increment:

- 'backend-support/src/route-metadata.ts'
- 'backend-support/src/___tests___/route-metadata.test.ts'
- 'src/lib/gateway-cloudcode-integration.test.ts'
- 'src/app/api/gateway/navigation/route.test.ts'

No '.env', credentials, governance files, protected runtime data, designer mock HTML/CSS, or parked duplicate files were changed.

Routes / UI Behavior

Expected behavior after this change:

- Mission Control Home exits target '/tkmc'.
- Gateway Overview exits target '/gateway'.
- Agent Hub exits target '/gateway/agent-hub'.
- Paperclip Agent Hub page safe back targets '/gateway/agent-hub'.
- Mounted Gateway pages have normalized route metadata instead of raw/unknown route errors.
- Old aliases still land safely:
 - '/agents' -> Gateway Agent Hub after authentication
 - '/agent-network' -> Gateway Agent Hub after authentication
 - '/gateway-parent' -> Gateway Agent Hub after authentication
 - '/gateways' -> Gateway Overview after authentication
 - '/gateway-config' -> Gateway Policies after authentication
- Protected route behavior is preserved.

Runtime / Deployment Proof

Source commit created:

- '752b0bc' - 'fix(navigation): add mounted gateway route metadata'

Local-only proof runtime:

- host: '127.0.0.1'
- port: '3337'
- PID: '79828'
- restart timestamp: 2026-05-10T13:12Z
- '/login': 200

The first detached restart attempt exited after printing 'Ready' without an error, so route smoke was run against an attached local-only proof runtime. No public listener was added.

Authenticated Navigation Smoke

Smoke base: 'http://127.0.0.1:3337'

Authenticated API context:

- 'x-api-key' loaded from local runtime settings without printing the value.
- 'mc-session=runtime-smoke-proxy-pass' cookie used for local smoke only.

Results:

- '/gateway': 200, current 'Gateway', safe back '/', breadcrumbs 'Mission Control > Gateway'
- '/gateway/agent-hub': 200, current 'Agent Hub', safe back '/gateway', breadcrumbs 'Mission Control > Gateway > Agent Hub'

- '/gateway/agent-hub/paperclip': 200, current 'Paperclip', safe back '/gateway/agent-hub', breadcrumbs 'Mission Control > Gateway > Agent Hub > Paperclip'

- '/gateway/routes': 200, current 'Routes', safe back '/gateway'
- '/gateway/registry': 200, current 'Registry', safe back '/gateway'
- '/gateway/policies': 200, current 'Policies', safe back '/gateway'
- '/gateway/health': 200, current 'Health', safe back '/gateway'
- '/gateway/dispatcher': 200, current 'Dispatcher', safe back '/gateway'
- '/gateway/token-governor': 200, current 'Token Governor', safe back '/gateway'
- '/gateway/bridge-session': 200, current 'Bridge Session', safe back '/gateway'
- '/gateway/missing': 404, classified safely as missing, no raw stack/error exposure

Route Rendering Smoke

Command:

- 'node scripts/check-mission-control-route-rendering.mjs http://127.0.0.1:3337'

Result:

- ok: true
- routes checked: 46
- designer pages checked: 8
- failures: 0

The smoke confirmed protected shell routes redirect to '/login' when unauthenticated, read-only Bridge APIs return JSON, and designer Mission Control pages remain auth-gated.

Tests Run

- 'pnpm test'
 - 171 files passed
 - 1361 tests passed
- 'pnpm run typecheck'
 - passed
- 'pnpm run build'
 - passed
- 'git diff --check'
 - passed
- 'pnpm --dir backend-support run typecheck'
 - passed
- 'pnpm --dir backend-support test'
 - 9 files passed
 - 106 tests passed
- 'node scripts/check-protected-file-invariants.mjs'
 - ok: true
- staged secret-pattern scan for source commit
 - ok: true
- '.env' diff check
 - clean

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No fake owner visual proof.
- No fake GO.
- No fake buttons added.
- No designer mock redesign.
- No Gateway FULL v3 token/class changes.
- No parked artifacts staged.
- Proof runtime bound to '127.0.0.1' only.

Remaining Blocker

Blocker: 'owner_authenticated_navigation_retest_required'

Classification: OWNER_GATED

Owner retest needed:

- Log in to Mission Control.
- Open '/tkmc'.
- Open '/gateway'.
- Open '/gateway/agent-hub'.
- Open '/gateway/agent-hub/paperclip'.
- Use Mission Control Home, Gateway Overview, Agent Hub, Paperclip safe back, and browser back.
- Confirm the owner is not trapped in Agent Hub or Paperclip.
- Confirm scroll position resets naturally when moving between pages.

Closeout Ledger

- Day number and lane: Day 14 - Mission Control Navigation / Back
- Status: DEVELOPER-SIDE CLOSED
- Blocker classification: OWNER_GATED
- Current source commit: 752b0bc
- Push result: pending at report generation; to be pushed with this report commit
- Runtime proof: local-only standalone proof on '127.0.0.1:3337', PID 79828
- Rollback command: 'git revert 752b0bc'
- Next day automatically started: Day 15 - Gateway Native Implementation Decision 100% Closure
