

Day 16 - Gateway Designer Fidelity 100% Closure

Date: 2026-05-10

Branch: to-knowledge-mc

Lane: Gateway Designer Fidelity

Status: DEVELOPER-SIDE CLOSED

Blocker class: OWNER_GATED for authenticated owner visual confirmation

Current source commit: 0c08e33

Prior frame/mount source commits: 25f577e, 836e059

Rollback: git revert 0c08e33

Scope

Day 16 verifies that production Gateway FULL v3 pages use the accepted designer mock contract in stead of a custom React reinterpretation.

The owner instruction is explicit: do not rebuild, restyle, or improve the mock. The accepted HT ML is the production UI. Data may hydrate through 'window.AGENTS', but the HTML/CSS/class contra ct must not drift.

This is not owner visual GO. Developer-side proof passes, but authenticated owner retest is stil l required before the Gateway owner visual lane can move beyond PARTIAL GO.

Inventory Findings

Designer contract files checked:

- 'design/gateway/Agent Hub.html'
- 'design/gateway/paperclip-v1/Paperclip.html'
- 'design/gateway/shared/tokens.css'
- 'design/gateway/shared/agent-data.js'
- 'public/designer-mission-control/design/gateway/Agent Hub.html'
- 'public/designer-mission-control/design/gateway/Paperclip.html'
- '.next/standalone/public/designer-mission-control/design/gateway/Agent Hub.html'
- '.next/standalone/public/designer-mission-control/design/gateway/Paperclip.html'

Production routes checked:

- '/gateway'
- '/gateway/routes'
- '/gateway/registry'
- '/gateway/policies'
- '/gateway/health'
- '/gateway/dispatcher'
- '/gateway/token-governor'
- '/gateway/agent-hub'
- '/gateway/agent-hub/paperclip'
- '/gateway/bridge-session'
- '/gateway/node-detail'
- '/gateway/mobile-tablet'

Defect Found

The mounted production 'Agent Hub.html' had one production-side HTML edit:

- accepted designer footer: 'data: shared/agent-data-v2-playwright-mcp.js'
- mounted production footer before fix: 'data: shared/agent-data.js'

The script still loads 'shared/agent-data.js' by design. The footer text is part of the accepted mock and should not have been changed in the mounted HTML. This was visual-contract drift, not backend truth wiring.

'Paperclip.html' already matched the accepted design file byte-for-byte.

What Was Implemented

- Restored the mounted production 'Agent Hub.html' from the accepted 'design/gateway/Agent Hub.html'.
- Added a regression guardrail:
 - 'design/gateway/Agent Hub.html' must exactly match 'public/designer-mission-control/design/gateway/Agent Hub.html'.
 - 'design/gateway/paperclip-v1/Paperclip.html' must exactly match 'public/designer-mission-control/design/gateway/Paperclip.html'.
- Left data hydration in JS. No rendering code, CSS, class names, or designer layout were changed.

Files Changed

- 'public/designer-mission-control/design/gateway/Agent Hub.html'
- 'src/lib/gateway-designer-fidelity.test.ts'

No '.env', credentials, governance files, protected runtime data, parked duplicate files, shared tokens, or mock class names were changed.

Fidelity Proof

Direct file proof:

- 'design/gateway/Agent Hub.html' matches 'public/designer-mission-control/design/gateway/Agent Hub.html'
- 'design/gateway/Agent Hub.html' matches '.next/standalone/public/designer-mission-control/design/gateway/Agent Hub.html'
- 'design/gateway/paperclip-v1/Paperclip.html' matches 'public/designer-mission-control/design/gateway/Paperclip.html'
- 'design/gateway/paperclip-v1/Paperclip.html' matches '.next/standalone/public/designer-mission-control/design/gateway/Paperclip.html'

HTTP proof:

- 'GET /designer-mission-control/design/gateway/Agent%20Hub.html' with local proof session: 200
- response contains accepted footer reference: 'shared/agent-data-v2-playwright-mcp.js'
- response still loads data script: 'src="shared/agent-data.js"'

The data script remains the correct place for live truth hydration.

Runtime / Deployment Proof

Local-only proof runtime:

- host: '127.0.0.1'
- port: '3337'
- PID after restart: '82838'
- '/login': 200
- no public listener added

Build synced public assets into '.next/standalone/public/'.

Route Smoke

Command:

- 'node scripts/check-mission-control-route-rendering.mjs http://127.0.0.1:3337'

Result:

- ok: true

- routes checked: 46
- designer pages checked: 8
- failures: 0

The smoke confirmed protected shell routes redirect to '/login' when unauthenticated, read-only Bridge APIs return JSON, and designer Mission Control pages remain auth-gated.

Tests Run

- 'pnpm test src/lib/gateway-designer-fidelity.test.ts'
 - RED before fix: 1 failed, proving mounted 'Agent Hub.html' drifted from accepted design.
 - GREEN after fix: 1 file passed, 2 tests passed.
- 'git diff --check'
 - passed
- 'pnpm run typecheck'
 - passed
- 'pnpm run build'
 - passed
- 'pnpm test'
 - 172 files passed
 - 1363 tests passed
- 'node scripts/check-protected-file-invariants.mjs'
 - ok: true
- staged secret-pattern scan
 - ok: true
- '.env' diff check
 - clean

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No fake owner visual proof.
- No fake GO.
- No fake buttons added.
- No designer mock redesign.
- No Gateway FULL v3 token/class changes.
- No parked artifacts staged.
- No SMB/Fork 2.
- No Zapier writes.
- No HeyGen generation.
- No external farmers.

Remaining Blocker

Blocker: 'owner_authenticated_gateway_fidelity_retest_required'

Classification: OWNER_GATED

Owner retest needed:

- Log in to Mission Control.
- Open '/gateway'.
- Open '/gateway/agent-hub'.
- Open '/gateway/agent-hub/paperclip'.
- Confirm the FULL v3 mounted UI is visible and matches the accepted mock.
- Confirm scroll works naturally.
- Confirm Mission Control Home / Gateway / Agent Hub navigation remains usable.

Closeout Ledger

- Day number and lane: Day 16 - Gateway Designer Fidelity

- Status: DEVELOPER-SIDE CLOSED
- Blocker classification: OWNER_GATED
- Current source commit: 0c08e33
- Push result: pending at report generation; to be pushed with this report commit
- Runtime proof: local-only standalone proof on '127.0.0.1:3337', PID 82838
- Rollback command: 'git revert 0c08e33'
- Next day automatically started: Day 17 - Gateway Overview 100% Closure
