

Phase 7 — Paperclip Service Health and Owner Login

Generated: 2026-05-07T22:46:46Z

Result

****Status:**** PARTIAL / DEGRADED

Paperclip sandbox service is running on Tailnet-only access and health passes. Owner login and Mission Control authenticated Paperclip data bridge are not fully proven yet.

****Exact blockers:****

- `paperclip\_auth\_required\_or\_not\_configured`
- `paperclip\_owner\_login\_browser\_session\_required`

Service / Exposure Proof

Check	Result
---	---
Paperclip process	running
Service manager unit	`paperclip.service` inactive; process is manual/sandbox
Bind address	Tailnet IP only
Tailnet URL	`http://100.116.35.95:3100`
Localhost URL	not listening on `127.0.0.1:3100`
Public bind `0.0.0.0`	no
Secondary websocket/stream port	`100.116.35.95:13100` returns upgrade-required behavior
Public Cloudflare exposure	not configured/proven

Paperclip Health Proof

Route	Result
---	---
`GET http://100.116.35.95:3100/api/health`	HTTP 200
Health payload status	`ok`
Deployment mode	`authenticated`
Bootstrap status	`ready`
Bootstrap invite active	no
`GET http://100.116.35.95:3100/`	HTTP 200 HTML shell

Mission Control Bridge Proof

Route	Result
-------	--------

	---		---	
	Authenticated		GET /api/bridge/paperclip/status`	HTTP 200
	Paperclip bridge mode		`paperclip_status_read_only`	
	Bridge blocker		`paperclip_auth_required_or_not_configured`	
	Authenticated		GET /api/bridge/paperclip/companies`	HTTP 503 / blocker
	Authenticated		GET /api/bridge/paperclip/agents`	HTTP 503 / blocker
	Authenticated		GET /api/bridge/paperclip/issues`	HTTP 503 / blocker
	Authenticated		GET /api/bridge/paperclip/tasks`	HTTP 200 read-only route contract
	Unauthenticated		GET /api/bridge/paperclip/status`	HTTP 401

Owner Login / Dashboard Proof

	Item		Result	
	---		---	
	Owner login browser proof		blocked	
	Company dashboard proof		blocked by Paperclip auth/session bridge	
	Agent roster proof		blocked by Paperclip auth/session bridge	
	Task queue view proof		route contract exists; live Paperclip task data blocked by auth/session bridge	
	Writes/task creation		blocked as required unless Bridge Session and adapter are configured	

Security / Governance Confirmation

- Paperclip is not exposed publicly.
- No Paperclip credentials or auth files were printed.
- No `.env` file was modified.
- No production Mission Control database was modified.
- No task creation/write action was performed.
- No external writes occurred.
- No Zapier, HeyGen, SMB, Farmer, upload, email, or connector write occurred.
- Paperclip remains the Workforce Control Plane between Gateway/Agent Zero/Pi/Hermes and OpenClaw+ runtime; it is not commander.

Updated Percentages

	System		Previous		Current		Notes	
	---		---		---		---	
	Paperclip service health		40%		62%		Tailnet sandbox health route passes.	
	Paperclip owner access		25%		35%		Tailnet UI shell reachable; owner login proof pending.	
	Paperclip Mission Control bridge		30%		35%		Status route works; data routes blocked by auth/session.	

Required Action

1. Owner logs into Paperclip through the Tailnet URL.
2. Configure a protected Paperclip session/API bridge for Mission Control without printing credentials.
3. Re-run companies, agents, issues, dashboard, and task queue proof.
4. Keep writes disabled until Bridge Session and adapter scope are proven.

Phase 7 Decision

Paperclip is ****PARTIAL / DEGRADED****: sandbox service health is proven, but owner login and authenticated data bridge remain blocked.
