

day-86-back-home-exit-acceptance

Day 86 â Back / Home / Exit Acceptance

Phase 0-20 Inventory

- Branch: 'to-knowledge-mc'
- Latest commit at start: '8557ff6'
- '.env' changes: none requested, none made
- Secret risk: no secrets inspected or emitted
- Scope: Mission Control / Gateway browser Back, workspace Home, Gateway Overview, Agent Hub, and Paperclip exit behavior
- Design constraint: approved Gateway mock HTML/CSS/class names remain untouched

Findings

- Gateway sub-tab changes updated the URL with 'history.replaceState', so browser Back could not replay 'Overview -> Agent Hub -> Paperclip'.
- The workspace rail hard-reloaded '/gateway' for the Gateway entry instead of using the active Mission Control shell state.
- Workspace page changes updated React state but did not always create browser history entries, which made app Back/Home behavior fragile inside the designer shell.
- CloudCode route metadata still treated '/' as Mission Control Home even though the concrete Mission Control route is '/tkmc'.

Implemented

- 'GatewayShell.jsx' now uses 'history.pushState' for real Gateway tab history and ignores same-tab clicks.
- 'WorkspaceRail.jsx' now calls the Mission Control shell navigator for every rail item instead of hard-reloading Gateway.
- 'app.jsx' now keeps workspace page changes in URL query state, removes stale 'tab' values when leaving Gateway, handles 'popstate', and resets the Mission Control scroll surface on page changes.
- Settings/search page changes now use the same workspace navigator.
- CloudCode route metadata now includes '/tkmc' as the canonical Mission Control home and returns '/tkmc' for owner-facing home targets.
- API/navigation/status tests were updated to assert the '/tkmc' home target and Gateway/Paperclip safe-back behavior.

Runtime Proof

- Local proof server: 'http://127.0.0.1:3340' on loopback only; stopped after proof.
- Browser proof: 'runtime/day-86-back-home-exit-acceptance/proof.json'
- Screenshot: 'runtime/day-86-back-home-exit-acceptance/gateway-back-home-exit.png'
- Result:
 - Gateway Overview loaded in the Mission Control Gateway shell.
 - Agent Hub click loaded '/design/gateway/Agent Hub.html'.
 - Paperclip click loaded '/design/gateway/Paperclip.html'.
 - Browser Back returned from Paperclip to Agent Hub.
 - Browser Back returned from Agent Hub to Gateway Overview.
 - Mission Control rail click switched to '?page=mission'.
 - Gateway rail click switched back to '?page=gateway'.
 - Browser Back returned from Gateway to Mission Control.
 - Direct raw static check for '/design/gateway/Agent Hub.html' returned '200' and rendered the designer canvas/breadcrumbs/Agent Zero content.

Route/Smoke Proof

- Protected route smoke: 'runtime/day-86-back-home-exit-acceptance/protected-route-smoke.json'
 - 'ok: true'
 - routes checked: '44'
 - failures: '[]'
- Authenticated route smoke harness: 'runtime/day-86-back-home-exit-acceptance/authenticated-rout

```
te-smoke.json'
- 'ok: true'
- blocker class: 'OWNER_GATED'
- owner visual proof claimed: 'false'
- blocker: 'owner_authenticated_browser_session_required'
```

Validation

```
- 'git diff --check' â PASS
- '.env' diff check â PASS, no output
- 'pnpm run build' â PASS; regenerated stale Next type surface and copied static assets to stand
alone output
- 'pnpm run typecheck' â PASS after build regenerated stale '.next/types'
- 'pnpm test' â PASS, 202 files / 1500 tests
- 'npm test' in 'backend-support/' â PASS, 9 files / 106 tests
- 'node scripts/check-protected-file-invariants.mjs' â PASS
- 'node scripts/secret-scan-contract.mjs' â PASS
- 'node scripts/raw-exposure-scan-contract.mjs' â PASS
- Unsupported command recorded: direct root Vitest filter for 'backend-support/src/__tests__/rou
te-metadata.test.ts' exits with no files by root config; backend package 'npm test' covers it.
```

Closure Ledger

```
- Lane: Back / Home / Exit acceptance
- Status: developer-side navigation/history proof complete; owner-auth production visual retest
remains gated
- Blocker class: 'OWNER_GATED'
- Files changed:
  - 'public/designer-mission-control/src/app.jsx'
  - 'public/designer-mission-control/src/gateway/GatewayShell.jsx'
  - 'public/designer-mission-control/src/replicas/WorkspaceRail.jsx'
  - 'backend-support/src/route-metadata.ts'
  - 'backend-support/src/__tests__/route-metadata.test.ts'
  - 'src/lib/gateway-cloudcode-integration.ts'
  - 'src/lib/gateway-cloudcode-integration.test.ts'
  - 'src/app/api/gateway/navigation/route.test.ts'
  - 'src/app/api/gateway/status/route.test.ts'
  - 'src/lib/mission-control-shell.test.ts'
  - 'runtime/day-86-back-home-exit-acceptance.md'
  - 'runtime/day-86-back-home-exit-acceptance/proof.json'
  - 'runtime/day-86-back-home-exit-acceptance/protected-route-smoke.json'
  - 'runtime/day-86-back-home-exit-acceptance/authenticated-route-smoke.json'
  - 'runtime/day-86-back-home-exit-acceptance/gateway-back-home-exit.png'
- Routes/endpoints changed: no new Next route; '/api/gateway/navigation' and '/api/gateway/statu
s' route metadata now report '/tkmc' as Mission Control Home.
- UI behavior: Gateway/Agent Hub/Paperclip remain raw approved designer files; shell history now
supports browser Back, Mission Control Home exit, Gateway re-entry, and Paperclip/Agent Hub tab
Back.
- Service/runtime behavior: no service behavior changed; local proof server started on loopback
and stopped.
- Deploy/restart result: production restart not performed in this lane; build proof completed lo
cally.
- Proof artifact: 'runtime/day-86-back-home-exit-acceptance/proof.json'
- Remaining blocker: owner-authenticated production visual retest requires an owner browser sess
ion.
- Exact blocker classification: 'OWNER_GATED'
```

Rollback

```
""bash
git revert <day-86-commit>
""
```

Next

- Automatically begin Day 87 after commit/push: Responsive Design.
