

Day 09 - Telegram Owner Command Lane 100% Closure

Date: 2026-05-09

Status: DEVELOPER-SIDE CLOSED, CREDENTIAL_GATED / OWNER_GATED

Decision: PARTIAL GO only. Telegram owner-command proof is wired to Agent Zero with dry-run status/proof, but live Telegram inbound/sending remains gated by missing runtime credentials/owner channel and Bridge approval.

Lane

Telegram owner command lane.

What Was Implemented

- Added canonical Telegram owner-command status fields to the Agent Zero Telegram delivery adapter.
- Added a Telegram proof packet for the lane:
 - timestamp
 - runtime commit placeholder
 - route checked
 - canonical status
 - blocker and blocker class
 - rollback command
 - Agent Zero active commander
 - Tony inactive
 - Bridge-required write/send policy
 - no fake delivery
 - no secret/raw-path exposure flags
- Updated the Telegram approval preview route to declare Agent Zero as the active owner command route.
- Kept the preview route dry-run only:
 - no execution
 - no persistence
 - no Telegram send
 - no approval request created
- Added tests proving:
 - Agent Zero is active commander for the lane
 - Tony is not active
 - owner command route is 'agent_zero'
 - send remains blocked without Bridge approval
 - no fake delivery path exists
 - no obvious token/raw-path leak appears in serialized status output

Files Changed

- 'src/lib/agent-zero-telegram-delivery.ts'
- 'src/lib/agent-zero-telegram-delivery.test.ts'
- 'src/app/api/bridge/telegram-approval-preview/route.ts'

Routes Changed

- 'GET /api/bridge/agent-zero/telegram/status'
 - Returns canonical status and proof packet.
 - Declares 'active_commander=agent_zero'.
 - Declares 'owner_command_route=agent_zero'.
 - Declares 'tony_active=false'.
- 'GET /api/bridge/telegram-approval-preview'
 - Returns the dry-run preview contract.
 - Confirms no execution, persistence, or send occurs.

- 'POST /api/bridge/telegram-approval-preview'
- Returns a dry-run Agent Zero owner-channel preview.
- Does not create an approval request.
- Does not persist.
- Does not send to Telegram.

UI / Owner-Facing Behavior

No UI control was made live in this hop.

The owner-facing behavior stays truthful:

- Telegram owner command lane routes through Agent Zero.
- Tony is not active.
- Telegram send/upload remains blocked until credentials, owner channel, and approved Bridge scope exist.
- Preview buttons are marked backend-required and do not pretend to send or approve.

Service / Runtime Behavior

Standalone loopback runtime:

- PID: 20776
- Bind: '127.0.0.1:3337'
- Public exposure: none added
- '/login': 200

Runtime smoke:

- Unauthenticated 'GET /api/bridge/agent-zero/telegram/status': 401
- Authenticated 'GET /api/bridge/agent-zero/telegram/status': 200
 - 'canonical_status=CREDENTIAL_GATED'
 - 'blocked_reason=telegram_report_delivery_adapter_not_configured'
 - missing credentials are listed by key name only:
 - 'TELEGRAM_BOT_TOKEN'
 - 'AGENT_ZERO_OWNER_TELEGRAM_CHAT_ID'
 - credential values not exposed
 - 'active_commander=agent_zero'
 - 'owner_command_route=agent_zero'
 - 'tony_active=false'
- Authenticated 'GET /api/bridge/telegram-approval-preview': 200 dry-run contract
- Authenticated 'POST /api/bridge/telegram-approval-preview': 200 dry-run preview, no send/persistence/execution
- Authenticated 'POST /api/bridge/agent-zero/telegram/upload-report' with missing report id: 423 blocked, 'accepted_for_execution=false', no fake send

Tests Run

- 'pnpm test src/lib/agent-zero-telegram-delivery.test.ts src/lib/agent-zero-report-delivery.test.ts'
- PASS: 2 files / 8 tests
- 'pnpm run typecheck'
- PASS
- 'git diff --check'
- PASS
- 'pnpm run build'
- PASS
- 'pnpm test'
- PASS: 140 files / 1266 tests
- 'node scripts/check-protected-file-invariants.mjs'
- PASS
- Staged secret scan
- PASS

- '.env' diff check
- clean

Proof Artifact

This report and PDF:

- 'runtime/day-09-telegram-owner-command-100-closure.md'
- 'runtime/day-09-telegram-owner-command-100-closure.pdf'

Remaining Blocker

Blocker classification: CREDENTIAL_GATED / OWNER_GATED

Exact blockers:

- 'telegram_report_delivery_adapter_not_configured'
- 'active_bridge_session_required'

Reason:

- Telegram bot token and owner Telegram chat id are not configured in the runtime used for proof
- .
- Even after connector configuration, external send/upload must remain blocked until Bridge Session approval exists.

Commit / Push

Code commit:

- '77fd39afeb375a59b354558cd09aaa3b5a0343dc'

Push:

- pushed to 'origin/to-knowledge-mc'

Rollback

```
""bash
git revert 77fd39afeb375a59b354558cd09aaa3b5a0343dc
""
```

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No new public exposure.
- No Telegram send attempted.
- No fake delivery.
- No fake Done.
- Tony was not modified as a controller, voice, memory, or governance owner.
- Active commander remains Agent Zero.

Next Day Started

Day 10 - Bridge Session Approvals 100% Closure starts next.
