

Day 02 FIRECRAWL-PREP-3 – Live Read-Only Smoke

Objective

Run one live read-only Firecrawl smoke only if prerequisites are present.

Prerequisites

1. Mission Control Firecrawl credential present.
2. Firecrawl backend adapter/runner configured.

Result

NOT RUN (prerequisites failed).

Actions Executed

1. Re-checked Firecrawl status route.
2. Re-checked backend execution readiness via jobs route.
3. Evaluated live-smoke eligibility for `https://example.com/`.

Commands / Routes Used

- `GET /api/firecrawl/status`
- `POST /api/firecrawl/jobs` with read-only scrape payload

Proof

- `key\_present=false`
- `sdk\_loaded=false`
- `state=CREDENTIAL\_REQUIRED`
- Jobs probe remained blocked with `credential\_required=true`

Files Changed

- None.

Tests

- Eligibility gate check: PASS (correctly prevented fake live smoke).

Blockers

- `firecrawl\_credential\_required`
- `firecrawl\_backend\_adapter\_not\_configured`

Required Status

- Firecrawl remains blocked (not marked GO).

Rollback

- No code change in this phase.

No-Secrets Confirmation

- No secret values printed.
- No external writes executed.

Updated Percentage

- Firecrawl remains blocked baseline until prerequisites are satisfied.

Exact Next Step

Complete secure credential sync and backend adapter wiring, then run exactly one read-only public-page smoke and generate ResearchPacket proof.
