

Day 02 MAIN-8 – YouTube Transcript Connector Proof

Objective

Prove YouTube metadata/transcript research path, or keep honest limited status.

Result

LIMITED / BLOCKED FOR TRANSCRIPT PROOF.

Actions Executed

1. Submitted a SpaceAgent research request that explicitly required YouTube transcript-backed claims for a public video URL.
2. Inspected resulting research packet for claims/sources/evidence.
3. Inspected SpaceAgent node capability registry for YouTube-specific capability IDs.

Commands / Routes Used

- `POST /api/gateway/space-agent/research`
- `GET /api/gateway/nodes/space-agent`

Proof

- Research request response:
 - `ok: true`
 - `packet.status: ready`
 - `research\_performed: false`
 - `claims: 0`
 - `web\_sources: 0`
 - `evidence: 0`
- Capability registry scan found no YouTube connector capability IDs.

Files Changed

- None.

Tests

- YouTube transcript request smoke: PARTIAL (request path works, transcript extraction not proven).

Blockers

- `youtube\_transcript\_connector\_not\_proven`

Rollback

- No code change in this phase.

No-Secrets Confirmation

- No credential values printed.
- No bypass behavior attempted.
- No restricted-content bypass attempted.

Updated Percentage

- YouTube research track remains PARTIAL / LIMITED.

Exact Next Step

Implement or wire transcript-capable YouTube adapter/connector path, then rerun with a public transcript-enabled video and verify claims + timestamps.
