

day-40-knowledge-report

Day 40 - Knowledge Report 100% Closure

Date: 2026-05-09

Lane: Brain / Knowledge Report

Status: DEVELOPER-SIDE PASS WITH SERVICE_DOWN BLOCKERS

Blocker class: SERVICE_DOWN

Source commit: '27b92df'

Push result: pushed to 'origin/to-knowledge-mc'

Objective

Produce a safe owner-facing Knowledge Report from the canonical Brain Sync status surface. The report must show indexed, not-indexed, blocked, disabled, and last-sync truth without raw local paths, credentials, private record dumps, or fake indexed claims.

Inventory

Existing truth source:

- 'GET /api/bridge/brain-sync/status'
- Local read-only adapters surfaced there:
 - Obsidian
 - MemPalace
 - Build-Wiki / Farmer approval and run history
 - Graphify as blocked/not connected when no adapter is visible

Existing report surfaces:

- 'GET /api/reports'
- 'GET /api/bridge/agent-zero/reports'
- Existing Agent Zero report delivery remains separate from Brain/Knowledge source status.

Gap found:

- There was no dedicated Knowledge Report contract for source buckets:
 - indexed
 - not indexed
 - blocked
 - disabled
 - last sync
- There was no safe Markdown report form for owner handoff.

Implemented Backend/API Behavior

Added:

- 'src/lib/knowledge-report.ts'
- 'GET /api/bridge/brain-sync/knowledge-report'

The new route:

- Requires authenticated viewer access.
- Reuses the Brain Sync status route as the canonical source.
- Returns JSON by default.
- Returns Markdown with '?format=markdown'.
- Uses safe Mission Control links:
 - '/gateway/brain'
 - '/gateway/bridge-session'
 - '/api/bridge/brain-sync/knowledge-report'
- Does not expose raw local paths.
- Does not expose secrets.
- Does not enable memory writes.

- Does not execute Build-Wiki/Farmer.
- Does not create a second vault.

UI / Button Behavior

Added a read-only button contract:

- Label: 'Knowledge report'
- Endpoint: '/api/bridge/brain-sync/knowledge-report'
- State: 'READ_ONLY'
- Fake success allowed: 'false'

No new visible fake button was added. The route exists and returns a real report.

Runtime Proof

Runtime:

- Bind: '127.0.0.1:3337'
- PID after restart: '64454'
- Runtime HEAD: '27b92df'
- Public exposure added: no

Route smoke:

- '/login' - 200
- unauthenticated '/api/bridge/brain-sync/knowledge-report' - 401
- authenticated '/api/bridge/brain-sync/knowledge-report' - 200
- authenticated '/api/bridge/brain-sync/knowledge-report?format=markdown' - 200, 'text/markdown'

Live Knowledge Report summary:

- Total sources: 6
- Indexed: 0
- Not indexed: 3
- Blocked: 3
- Disabled: 0
- Last sync: none visible

Current blockers:

- 'graphify_not_available'
- 'mempalace_not_visible'
- 'obsidian_vault_missing_or_unreadable'

Safety proof:

- 'raw_local_paths_exposed=false'
- 'memory_writes_enabled=false'
- 'external_writes_enabled=false'
- 'bridge_session_required_for_writes=true'

Proof artifact:

- 'runtime/day-40-knowledge-report-proof.json'

Tests Run

- 'pnpm test src/lib/knowledge-report.test.ts' - red before implementation, then pass
- 'pnpm test src/app/api/bridge/brain-sync/knowledge-report/route.test.ts' - red before route implementation, then pass
- 'pnpm test src/lib/knowledge-report.test.ts src/app/api/bridge/brain-sync/knowledge-report/route.test.ts src/app/api/bridge/brain-sync/status/route.test.ts src/lib/button-contracts-route.test.ts' - PASS, 4 files / 8 tests

- 'node scripts/check-button-contract-routes.mjs' - PASS, new endpoint resolved
- 'git diff --check' - PASS
- 'pnpm run typecheck' - PASS
- 'pnpm run build' - PASS; '/api/bridge/brain-sync/knowledge-report' appears in the production route list
- 'pnpm test' - PASS, 161 files / 1334 tests
- 'node scripts/check-protected-file-invariants.mjs' - PASS
- 'node scripts/check-button-contract-live-status.mjs http://127.0.0.1:3337' - PASS, knowledge report route returned 200
- staged secret scan - PASS
- '.env' diff check - clean

Deploy / Restart

Mission Control was restarted because Day 40 added runtime API source.

No public bind was added; runtime remains local-only on '127.0.0.1:3337'.

Remaining Blocker

'SERVICE_DOWN'

The report generator is complete, but the live source data still has current blocked sources:

- Graphify adapter not available.
- MemPalace not visible.
- Obsidian vault missing or unreadable.

These are truthful source blockers, not report-generator blockers.

Rollback

```
""bash
git revert 27b92df
""
```

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No raw local paths in the report output.
- No external writes.
- No Build-Wiki/Farmer execution.
- No SMB/Fork 2.
- No second vault.

Next Day Started

Day 41 - Brain Security Sweep automatically starts after the report commit is pushed.
