

Phase 10 — Build-Wiki / Farmer Fork 1 Report

Generated: 2026-05-08T00:30:51Z

Result

****Status:**** SAFE / NO EXECUTION

Build-Wiki / Farmer remains under OpenClaw+ as a scoped worker/docs sync service. Fork 1 is the only allowed Run Now path, and it was not executed because no active Bridge Session/owner approval scope is present.

Systemd Proof

Check	Result
Farmer timer unit	opencloud-docs-farmer.timer
Timer active	active
Timer active timestamp	Wed 2026-05-06 22:37:40 EDT
Next scheduled elapse	Thu 2026-05-07 21:37:17 EDT
Farmer service unit	opencloud-docs-farmer.service
Service active	inactive
Service MainPID	0
Service last result	success

The unit names are legacy systemd names. Owner-facing architecture remains OpenClaw+ / Build-Wiki / Farmer.

Fork / SMB Safety

Check	Result
Fork 1 safe path retained	true
Fork 2 executed	false
SMB mounted	false
SMB/Fork 2 blocker	smb_not_mounted_and_not_approved
Run Now executed	false
Allowed Run Now command if approved	systemctl --user start opencloud-docs-farmer.service

Mission Control Route Proof

Route	Auth state	HTTP	Result
GET /api/bridge/brain-sync/build-wiki/status	unauthenticated	401	Unauthorized

Authenticated Build-Wiki route proof remains pending until an owner/operator session or approved route credential is available.

Guardrails Confirmed

- No farmer service was started.
- No external farmer was run.
- No SMB mount was attempted.
- No Fork 2 action occurred.
- No OpenClaw+ data, Build-Wiki data, Farmer data, skills, tools, or runtime evidence was deleted.
- No `.env` file was modified.
- No secrets, auth files, raw paths, or internal task IDs were printed.

Phase 10 Decision

Phase 10 is ****SAFE / PARTIAL GO**** for status proof and ****GATED**** for Run Now with ``bridge_session_required_for_run_now``.
