

Day 83 â Gateway Designer Side-by-Side

Lane: Gateway UX final pass

Status: Developer-side closed, production owner-auth retest gated

Blocker class: OWNER_GATED

Checked at: 2026-05-12T03:20:00Z

What Was Implemented

- Added a protected raw Gateway design asset route at '/design/gateway/[...path]]'.
- Pointed 'GatewayShell.jsx' iframe tabs at '/design/gateway/*.html', matching the designer's direct verification path.
- Kept approved mock HTML/CSS/class names untouched.
- Kept the live read-only 'window.AGENTS' / Gateway data hydration files in place.
- Added route/security tests proving the new raw design route serves mounted designer files without rewriting and remains behind the owner session gate.
- Added the new raw design URLs to the protected route smoke contract so future smokes fail if they become public.

Files Changed

- 'public/designer-mission-control/src/gateway/GatewayShell.jsx'
- 'scripts/protected-route-smoke-contract.mjs'
- 'src/app/design/gateway/[...path]]/route.ts'
- 'src/app/design/gateway/route.test.ts'
- 'src/lib/gateway-native-frame-decision.test.ts'
- 'src/lib/mission-control-shell.test.ts'
- 'src/lib/protected-route-smoke-contract.test.ts'
- 'src/proxy.ts'
- 'src/proxy.test.ts'
- 'runtime/day-83-gateway-designer-side-by-side/proof.json'
- 'runtime/day-83-gateway-designer-side-by-side/protected-route-smoke.json'
- 'runtime/day-83-gateway-designer-side-by-side/direct-design-agent-hub.png'
- 'runtime/day-83-gateway-designer-side-by-side/gateway-shell-agent-hub.png'

Routes / Endpoints Changed

- Added 'GET /design/gateway/[...path]]'
- Added 'HEAD /design/gateway/[...path]]'
- Gateway shell now frames:
 - '/design/gateway/Gateway Overview.html'
 - '/design/gateway/Agent Hub.html'
 - '/design/gateway/Paperclip.html'
 - '/design/gateway/Dispatcher.html'
 - '/design/gateway/Token Governor.html'
 - '/design/gateway/Bridge Session Flow.html'
 - '/design/gateway/Gateway Health.html'
 - '/design/gateway/Gateway Routes.html'
 - '/design/gateway/Gateway Registry.html'
 - '/design/gateway/Gateway Policies.html'
 - '/design/gateway/Gateway Node Detail.html'
 - '/design/gateway/Gateway Mobile Tablet.html'

UI Behavior

- '/gateway?tab=agent-hub' redirects to the designer Mission Control shell and opens Gateway with the Agent Hub tab active.
- The Agent Hub iframe source is '/design/gateway/Agent Hub.html'.
- '/design/gateway/Agent Hub.html' is directly verifiable as the raw mounted designer file once an owner session exists.
- Unauthenticated '/design/gateway/*' requests redirect to '/login', preserving no-public-local-exposure.

- No React reimplementation, Next page wrapper, HTML rewrite, CSS rewrite, or class-name rewrite was introduced.

Service / Runtime Behavior

- Local proof server: 'pnpm exec next dev --hostname 127.0.0.1 --port 3337'
- Runtime proof:
 - unauthenticated '/design/gateway/Agent%20Hub.html' -> '/login'
 - authenticated local proof cookie '/design/gateway/Agent%20Hub.html' -> '200', 'Content-Type: text/html; charset=utf-8'
 - fetched route SHA-256 matched 'public/designer-mission-control/design/gateway/Agent Hub.html',
 - '/gateway?tab=agent-hub' -> '/designer-mission-control/Mission%20Control.html?page=gateway&tab=agent-hub'
 - Gateway iframe source -> '/design/gateway/Agent Hub.html'
- Production/systemd restart was not performed in this local runtime because 'systemctl' is not available.

Tests Run

- 'pnpm exec vitest run src/app/design/gateway/route.test.ts src/proxy.test.ts src/lib/gateway-native-frame-decision.test.ts src/lib/mission-control-shell.test.ts src/lib/protected-route-smoke-contract.test.ts'
- 5 files passed, 25 tests passed
- 'pnpm run typecheck'
- passed
- 'pnpm run build'
- passed; build output includes dynamic '/design/gateway/[...path]'
- 'pnpm test'
- 202 files passed, 1498 tests passed
- 'node scripts/check-protected-file-invariants.mjs'
- passed; no protected changes
- 'node scripts/secret-scan-contract.mjs'
- passed; blocker class 'NONE'
- 'node scripts/raw-exposure-scan-contract.mjs'
- passed; blocker class 'NONE'
- 'git diff --check'
- passed
- '.env' diff check
- no diff
- 'node scripts/protected-route-smoke-contract.mjs http://127.0.0.1:3337'
- passed after warming '/docs'; 44 routes checked, 0 failures

Proof Artifacts

- 'runtime/day-83-gateway-designer-side-by-side/proof.json'
- 'runtime/day-83-gateway-designer-side-by-side/protected-route-smoke.json'
- 'runtime/day-83-gateway-designer-side-by-side/direct-design-agent-hub.png'
- 'runtime/day-83-gateway-designer-side-by-side/gateway-shell-agent-hub.png'

Remaining Blocker

OWNER_GATED:

- Owner-authenticated production browser retest is still required after the deployed runtime is restarted to this commit.
- This local proof environment does not expose 'systemctl', so production service restart proof could not be executed here.
- Live API hydration inside the static iframe returned 401 under a synthetic local cookie, which is expected without a real owner session. The raw mock serving path and iframe mount are proven.

Rollback Command

After commit:

```
""bash
git revert <day-83-commit>
""
```

Before commit:

```
""bash
git restore public/designer-mission-control/src/gateway/GatewayShell.jsx scripts/protected-route
-smoke-contract.mjs src/proxy.ts src/proxy.test.ts src/lib/gateway-native-frame-decision.test.ts
src/lib/mission-control-shell.test.ts src/lib/protected-route-smoke-contract.test.ts
rm -rf src/app/design runtime/day-83-gateway-designer-side-by-side
""
```

Commit / Push

- Commit hash: pending
- Push result: pending

Next Day

Day 84 â Agent Hub Designer Side-by-Side has automatically started after this Day 83 developer-s
ide closure.
