

Day 82 - Agent Integration Final Closeout

Status: PASS for developer-side agent integration final closeout
Blocker class: NONE for this lane

Lane

Close the Days 73-81 multi-agent integration block by proving the registry, dispatcher integrations, Bridge-gated protected agent actions, OpenClaw+ Gateway truth, status consistency, and proof packets all line up in the current runtime.

What Was Verified

- Day 73 canonical agent registry is present.
- Day 74 Agent Zero dispatcher route is present and read-only.
- Day 75 Hermes dispatcher route is present and read-only.
- Day 76 Pi dispatcher route is present and advisory-only.
- Day 77 Paperclip protected actions remain Bridge-gated.
- Day 78 SpaceAgent protected research remains Bridge-gated.
- Day 79 OpenClaw+ Gateway runtime truth is visible.
- Day 80 Agent Hub status consistency reports 6 checked agents and 0 issues.
- Day 81 multi-agent proof packet reports 6 proof packets and 0 consistency issues.

Files Changed

- 'runtime/day-82-agent-integration-final-closeout-proof.json'
- 'runtime/day-82-agent-integration-final-closeout.md'
- 'runtime/day-82-agent-integration-final-closeout.pdf'

No source code was changed for Day 82. This lane closes the agent-integration block with proof artifacts.

Routes Verified

- 'GET /api/gateway/agent-hub/status'
- 'GET /api/gateway/agent-hub/proof-packet'
- 'GET /api/gateway/dispatcher/agent-zero'
- 'GET /api/gateway/dispatcher/hermes'
- 'GET /api/gateway/dispatcher/pi'
- 'GET /api/gateway/agent-hub/agents/paperclip/health'
- 'GET /api/gateway/agent-hub/agents/openclaw-plus/health'

UI Behavior

No Gateway designer HTML, CSS, class names, or visual assets were modified.

Mission Control and Agent Hub now have backend truth available for:

- canonical agent registry
- dispatcher status
- Agent Hub health rows
- CloudCode health ids
- multi-agent consistency
- proof packets
- exact blockers

No lane is marked GO just because the route exists. Individual agent blockers remain visible.

Service / Runtime Behavior

Runtime proof used a short-lived local-only standalone Mission Control runtime bound to '127.0.0.1:3337'. The proof server was started only for smoke verification and was shut down by the proof

f script.

No external writes were enabled. No Bridge action was executed. No '.env' file was changed. No A
PI key was printed.

Tests And Checks

Day 82 did not add source code. The closeout relies on the already-pushed Day 81 verification pl
us a fresh runtime proof:

- Day 81 'pnpm run typecheck': PASS
- Day 81 'pnpm run build': PASS
- Day 81 'pnpm test': PASS, 201 files, 1493 tests
- Day 81 'git diff --check': PASS
- Day 81 protected-file invariants: PASS
- Day 81 secret scan contract: PASS
- Day 81 raw exposure scan contract: PASS
- Day 81 '.env' diff check: clean
- Day 82 protected route smoke: PASS, 42 routes, 0 failures
- Day 82 authenticated agent integration proof: PASS, 7 routes, 6 proof packets, 0 consistency i
ssues

Proof

Proof artifact: 'runtime/day-82-agent-integration-final-closeout-proof.json'

Observed runtime proof:

- Agent Hub status: HTTP 200
- Multi-agent proof packet: HTTP 200
- Agent Zero dispatcher: HTTP 200
- Hermes dispatcher: HTTP 200
- Pi dispatcher: HTTP 200
- Paperclip health: HTTP 200, owner status SERVICE_DOWN, blocker 'paperclip_sandbox_service_not_
running'
- OpenClaw+ health: HTTP 200, owner status SERVICE_DOWN, blocker 'openclaw_doctor_runtime_not_re
achable'
- execution enabled: false
- writes enabled: false
- external writes enabled: false
- secrets exposed: false
- raw paths exposed: false

Remaining Blockers

No Day 82 closeout blocker remains.

The following individual agent blockers remain truthful and are carried into later lanes:

- 'agent_zero_external_api_key_missing'
- 'hermes_not_installed'
- 'paperclip_sandbox_service_not_running'
- 'playwright_mcp_service_unreachable'
- 'firecrawl_credential_required'
- 'openclaw_doctor_runtime_not_reachable'

Blocker classification for Day 82: NONE

Rollback

After commit:

```
""bash  
git revert <day-82-agent-integration-final-closeout-commit>
```

“
Commit / Push

Pending at report generation time.

Next Day

Day 83 - Gateway Designer Side-by-Side automatically starts after this lane closes.
