

Day 29 â Approval Audit Export / Report 100% Closure

Date: 2026-05-09

Lane: Bridge approval audit export / report

Status: CLOSED

Blocker classification: NONE

What Was Implemented

- Added a protected read-only Bridge approval audit report endpoint.
- The report exports persisted approval request lifecycle, latest scoped run result, and audit history.
- The endpoint is explicitly non-executing:
 - 'execution_enabled: false'
 - 'writes_enabled: false'
 - 'no_connector_writes_enabled: true'
- If approval persistence is unavailable, the route returns a truthful unavailable report instead of fake data.
- Audit metadata is sanitized before leaving the route.

Files Changed

- 'src/app/api/bridge/approval-requests/audit-report/route.ts'
- 'src/app/api/bridge/approval-requests/audit-report/route.test.ts'
- 'runtime/day-29-approval-audit-report-proof.json'
- 'runtime/day-29-approval-audit-export-report-100-closure.md'
- 'runtime/day-29-approval-audit-export-report-100-closure.pdf'

Routes / Endpoints Changed

- Added 'GET /api/bridge/approval-requests/audit-report'

Auth behavior:

- Unauthenticated request: '401'
- Authenticated viewer+ request: '200'

Response behavior:

- 'mode: approval_audit_report' when persistence is ready.
- 'mode: approval_audit_report_unavailable' when approval/audit tables are missing.
- Includes request lifecycle, scope, latest execution run state, audit events, summary counts, rollback reference, and safety flags.

UI Behavior

No owner-facing UI surface was changed in this day.

The endpoint is ready for Mission Control / Bridge UI and reports to consume without exposing raw paths, secrets, or fake execution state.

Service / Runtime Proof

Local Mission Control standalone runtime:

- Bind: '127.0.0.1:3337'
- PID: '26786'
- '/login': '200'
- 'GET /api/bridge/approval-requests/audit-report' unauthenticated: '401'
- 'GET /api/bridge/approval-requests/audit-report' authenticated: '200'
- Mode: 'approval_audit_report'
- Persistence ready: 'true'
- Request count in report: '8'
- Summary:
 - total: '8'

- pending: '1'
- approved: '5'
- denied: '2'
- expired: '0'
- failed runs: '5'
- Unsafe output scan: 'false'

Proof artifact:

- 'runtime/day-29-approval-audit-report-proof.json'

Tests Run

- 'pnpm test 'src/app/api/bridge/approval-requests/audit-report/route.test.ts''
 - PASS: 1 file / 3 tests
- Focused Bridge route tests:
 - PASS: 4 files / 12 tests
- 'pnpm run typecheck'
 - PASS
- 'pnpm run build'
 - PASS
- 'pnpm test'
 - PASS: 155 files / 1322 tests
- 'git diff --check'
 - PASS
- 'git diff --cached --check'
 - PASS
- 'node scripts/check-protected-file-invariants.mjs'
 - PASS
- Staged secret scan
 - PASS
- '.env' diff check
 - PASS, no '.env' changes

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No Bridge execution was triggered by the report endpoint.
- No connector writes were enabled.
- No SMB / Fork 2 / external farmers.
- No Zapier writes.
- No HeyGen generation.
- No fake report data.

Commit / Push

Source commit:

- '6be243f' â 'feat(bridge): export approval audit report'

Report commit:

- this report artifact commit

Push:

- pushed to 'origin/to-knowledge-mc' after artifact commit

Rollback

Source rollback:

```
""bash
git revert 6be243f
""
```

Report rollback:

```
""bash
git revert <day29_report_commit_sha>
""
```

Next Day Started

Day 30 â Bridge + Agent Action Integration will start automatically after this report is committed and pushed.
