

Day 6 Phase 058 - Build-Wiki / Farmer Run Now UI

****Objective****

Verify Build-Wiki / Farmer Run Now is present, safe, and approval-gated under OpenClaw+.

****Actions****

- Queried Build-Wiki status, files, and logs routes.
- Queried button contracts.
- Did not create a Run Now approval request because no active Bridge Session was proven for this phase.
- Did not start the farmer manually.

****Proof****

- Build-Wiki status route: authenticated 200, unauthenticated 401, read-only true, timer active, last result success.
- Build-Wiki files route: authenticated 200, no raw paths, no secret-shaped values.
- Build-Wiki logs route: authenticated 200, no raw paths, no secret-shaped values.
- Button contracts route marks Run Now as owner approval required, not live fake execution.

****Decision****

PARTIAL GO / GATED. Status/read proof is live. Run Now remains blocked until an active owner-approved Bridge Session exists.

****Blockers****

- active_bridge_session_required_for_buildwiki_run_now.
- No SMB/Fork 2 approval or mount exists.

****Files Changed****

- src/app/api/openclaw/doctor/route.ts
- src/app/api/bridge/brain-sync/status/route.ts
- src/app/api/bridge/brain-sync/build-wiki/files/route.ts
- src/app/api/bridge/brain-sync/build-wiki/logs/route.ts
- Operational monitor script: expected configured-agent count updated from 12 to 13 with timestamped backup health-monitor.sh.bak-20260507-233533.

****Tests And Validation****

- Mission Control focused Day 6 tests: 20 passed across sanitizer and mini-agent suites.
- Mission Control typecheck: passed.
- Mission Control build: passed.
- Mission Control full test suite: 134 files passed, 1,241 tests passed.
- ClaudeClaw/OpenClaw+ typecheck: passed.

- ClaudeClaw/OpenClaw+ build: passed.
- ClaudeClaw/OpenClaw+ design-lock verify: passed.
- ClaudeClaw/OpenClaw+ test suite under Node 24: 61 files passed, 1,215 tests passed, 4 skipped.
- ClaudeClaw/OpenClaw+ gauntlet: 370/370 passed.

****Services****

- Mission Control standalone: active on loopback after controlled respawn, PID 2754961, restart timestamp Thu May 7 23:42:28 2026.
- OpenClaw+ gateway service: active/running, local loopback only.
- OpenClaw+ health monitor: oneshot completed successfully after repair.
- ClaudeClaw service: active/running.
- Build-Wiki / Farmer timer: active/waiting.
- opencloud-docs-farmer.service: inactive after last successful scheduled run; not manually started by Codex.

****Security / Hard Rules****

No secrets, tokens, auth files, API keys, .env values, or raw local filesystem paths were printed in owner-facing output or committed. Staged scan passed before the code commit; route payload scans were clean after restart.

Confirmed again: no .env change, no SMB/Fork 2, no Zapier writes, no HeyGen generation, no public local service exposure, no external farmer execution, no auth weakening, no deletes, and no fake Done.

****Commits****

- Code fix pushed: 404f08d fix(gateway): redact brain and openclaw diagnostics.
- Day 6 report artifact commit: pending.

****Rollback****

- Code rollback: `git revert 404f08d`.
- Operational health monitor rollback: restore backup health-monitor.sh.bak-20260507-233533 over the active monitor script, then rerun the health monitor.

****Updated Percentages****

Item Result
--- ---
OpenClaw+ 88% PARTIAL GO
Mini-Agent OS 88% PARTIAL GO / GATED
Build-Wiki / Farmer 78% PARTIAL GO / GATED
Gateway / Agent Hub 93% PARTIAL GO
Overall ecosystem 93% PARTIAL GO

****Next Step****

Day 8 Bridge Session proof can exercise the approval request path without running Fork 2 or mounting SMB.

Report generated: 2026-05-07 23:45 EDT.
