

Day 6 Phase 059 - Build-Wiki / Farmer Fork 1 Proof

****Objective****

Keep Build-Wiki safe and scoped under OpenClaw+ / Build-Wiki / Farmer.

****Actions****

- Verified the Build-Wiki / Farmer timer status.
- Verified the literal legacy unit opencloud-docs-farmer.service exists and last scheduled result was success.
- Did not run the service manually because a scoped Bridge Session was not active.
- Confirmed Fork 2 and SMB remain blocked.

****Proof****

- Timer: active/waiting.
- Literal legacy service: inactive after successful scheduled run.
- Mission Control status route: authenticated 200 with timer active and last result success.
- No manual `systemctl --user start opencloud-docs-farmer.service` execution occurred.

****Decision****

PARTIAL GO / GATED. Fork 1 scheduled path is visible and healthy; manual Run Now remains Bridge Session gated.

****Blockers****

- active_bridge_session_required_for_buildwiki_run_now.
- No SMB/Fork 2.
- No external farmers.

****Files Changed****

- src/app/api/openclaw/doctor/route.ts
- src/app/api/bridge/brain-sync/status/route.ts
- src/app/api/bridge/brain-sync/build-wiki/files/route.ts
- src/app/api/bridge/brain-sync/build-wiki/logs/route.ts
- Operational monitor script: expected configured-agent count updated from 12 to 13 with timestamped backup health-monitor.sh.bak-20260507-233533.

****Tests And Validation****

- Mission Control focused Day 6 tests: 20 passed across sanitizer and mini-agent suites.
- Mission Control typecheck: passed.
- Mission Control build: passed.
- Mission Control full test suite: 134 files passed, 1,241 tests passed.
- ClaudeClaw/OpenClaw+ typecheck: passed.
- ClaudeClaw/OpenClaw+ build: passed.

- ClaudeClaw/OpenClaw+ design-lock verify: passed.
- ClaudeClaw/OpenClaw+ test suite under Node 24: 61 files passed, 1,215 tests passed, 4 skipped.
- ClaudeClaw/OpenClaw+ gauntlet: 370/370 passed.

****Services****

- Mission Control standalone: active on loopback after controlled respawn, PID 2754961, restart timestamp Thu May 7 23:42:28 2026.
- OpenClaw+ gateway service: active/running, local loopback only.
- OpenClaw+ health monitor: oneshot completed successfully after repair.
- ClaudeClaw service: active/running.
- Build-Wiki / Farmer timer: active/waiting.
- opencloud-docs-farmer.service: inactive after last successful scheduled run; not manually started by Codex.

****Security / Hard Rules****

No secrets, tokens, auth files, API keys, .env values, or raw local filesystem paths were printed in owner-facing output or committed. Staged scan passed before the code commit; route payload scans were clean after restart.

Confirmed again: no .env change, no SMB/Fork 2, no Zapier writes, no HeyGen generation, no public local service exposure, no external farmer execution, no auth weakening, no deletes, and no fake Done.

****Commits****

- Code fix pushed: 404f08d fix(gateway): redact brain and openclaw diagnostics.
- Day 6 report artifact commit: pending.

****Rollback****

- Code rollback: `git revert 404f08d`.
- Operational health monitor rollback: restore backup health-monitor.sh.bak-20260507-233533 over the active monitor script, then rerun the health monitor.

****Updated Percentages****

Item	Result
---	---
OpenClaw+	88% PARTIAL GO
Mini-Agent OS	88% PARTIAL GO / GATED
Build-Wiki / Farmer	78% PARTIAL GO / GATED
Gateway / Agent Hub	93% PARTIAL GO
Overall ecosystem	93% PARTIAL GO

****Next Step****

Use only the literal legacy service for any future approved Fork 1 run; owner-facing architecture remains OpenClaw+ / Build-Wiki / Farmer.

Report generated: 2026-05-07 23:45 EDT.
