

# Phase 7 — Paperclip Service And Owner Login Report

Generated: 2026-05-08T00:27:18Z

## Result

**\*\*Status:\*\*** PARTIAL / SERVICE HEALTHY, OWNER LOGIN BLOCKED

Exact blocker: `paperclip\_owner\_session\_required`.

Paperclip is reachable on the Tailnet health endpoint, but owner login/session proof was not completed from this non-interactive worker. No Paperclip task creation or write action was attempted.

## Service Health Proof

| Check                             | Result                               |
|-----------------------------------|--------------------------------------|
| Tailnet health URL                | http://100.116.35.95:3100/api/health |
| Tailnet health HTTP               | 200                                  |
| Tailnet health status             | ok                                   |
| Deployment mode                   | authenticated                        |
| Bootstrap status                  | ready                                |
| Localhost health HTTP             | 0                                    |
| UI root Tailnet HTTP              | 200                                  |
| Public wildcard exposure detected | false                                |

## Owner Login / UI Proof

| Check                         | Result |
|-------------------------------|--------|
| Owner login proven            | false  |
| Company dashboard proven      | false  |
| Agent roster proven           | false  |
| Task queue proven             | false  |
| Write/task creation attempted | false  |

## Mission Control Bridge Route Proof

| Route                            | Auth state      | HTTP | Result       |
|----------------------------------|-----------------|------|--------------|
| GET /api/bridge/paperclip/status | unauthenticated | 401  | Unauthorized |

Authenticated Mission Control Paperclip bridge proof remains pending until an owner/operator session or approved route credential is available.

## Guardrails Confirmed

- Paperclip is not exposed on a public wildcard interface.
- No public Cloudflare route was created.
- No production ``.env`` file was modified.
- No secrets or auth files were printed.
- No Paperclip task creation, external write, upload, email send, Zapier write, HeyGen generation, SMB/Fork 2, or farmer execution occurred.
- Paperclip remains Workforce Control Plane before OpenClaw+ runtime execution; it is not commander and it does not replace OpenClaw+.

## Phase 7 Decision

Phase 7 is **\*\*PARTIAL\*\*** for service health and **\*\*BLOCKED\*\*** for owner login with ``paperclip_owner_session_required``.
