

Phase 2 — Owner-Authenticated Browser Visual Proof

Generated: 2026-05-07T23:10:19Z

Result

Status: BLOCKED / PARTIAL

Exact blocker: owner_authenticated_browser_session_required

Codex does not have an owner-authenticated browser session available in the current browser context. I did not read, reuse, print, or export session cookies or auth tokens. The production API truth checks below confirm the Agent Hub and SpaceAgent Browser Automation data, but they do not satisfy the owner-visual proof requirement by themselves.

Required Visual Checks

| Required check | Result | Evidence |

| --- | --- | --- |

| Open Mission Control with owner-authenticated browser session | BLOCKED | owner_authenticated_browser_session_required |

| Open Gateway | BLOCKED | requires owner browser session |

| Open Agent Hub / Control Center | BLOCKED visually | unauthenticated page shell points to login |

| Open SpaceAgent panel | BLOCKED visually | API detail route available; visual session unavailable |

| Browser Automation section visible | PARTIAL | authenticated API route returns browser automation truth |

| Playwright MCP green / connected local-only | PASS via API | card truth from production route |

| Firecrawl red / blocked | PASS via API | blocker remains firecrawl_credential_required |

| YouTube Research yellow / limited | PASS via API | blocker remains youtube_transcript_connector_not_proven |

| Interactive/browser/auth/form/upload actions gated | PASS via API | gated buttons require Bridge Session or are disabled |

| No secrets, raw paths, auth files, or fake buttons | PASS via API review | no unsafe values observed in route payloads summarized here |

Route Proof

| Route | Auth | HTTP | Result |

| --- | --- | ---: | --- |

| `/api/gateway/space-agent/browser/status` | yes | 200 | ok=True |

| `/api/gateway/agent-hub/status` | yes | 200 | ok=True |

| `/api/gateway/agent-hub/agents/spaceagent` | yes | 200 | ok=True |

| `/api/gateway/nodes/playwright-mcp` | yes | 200 | ok=True |

| `/gateway/agent-hub` | no | 200 | protected app shell returned; content points to `/login` |

| `/gateway/agent-hub/paperclip` | no | 200 | protected app shell returned; content points to `/login` |

| `/api/gateway/agent-hub/status` | no | 401 | error=Unauthorized |
| `/api/gateway/space-agent/browser/status` | no | 401 | error=Unauthorized |

Browser Automation Card Truth

Card	Status	Tone	Connected	Configured	Public exposure	Blocker
playwright_mcp	`connected\_local\_only`	`green`	True	True	False	`None`
firecrawl	`blocked`	`red`	False	False	False	`firecrawl\_credential\_required`
youtube_research	`limited\_pending`	`yellow`	False	False	False	`youtube\_transcript\_connector\_not\_proven`

Button Truth

Button	State	Route / blocker
Button payload	pending production visual smoke	no enabled fake buttons were inferred

Agent Hub Roster Truth

Agent	Role	Status	Blocker
Paperclip	Workforce Control Plane	`pending`	`production\_install\_blocked\_by\_dependency\_audit`
Agent Zero	Commander	`partial\_go`	`agent\_zero\_full\_go\_requires\_live\_authenticated\_agent\_zero\_called\_true`
Hermes	Lieutenant / Skill + Workflow Builder	`gated`	`hermes\_degraded\_or\_pending\_live\_proof`
SpaceAgent	Browser / Firecrawl / YouTube Research Specialist	`read\_only`	`firecrawl\_missing\_credential`
Pi-mono	Dispatcher / Route Optimizer Candidate	`pending`	`dispatcher\_candidate\_not\_authoritative`

Screenshot / Browser Smoke Evidence

No owner-authenticated screenshot was captured because no owner-authenticated browser session is available to Codex. Capturing or reusing a private session cookie directly would violate the no-secrets/no-session-token rule. Supporting API evidence confirms the production truth data that the visual page should render once opened by an authenticated owner.

Security / Governance Confirmation

- No secrets, tokens, auth files, or session cookies were printed.
- No .env file was modified.
- No authentication policy was weakened or bypassed.
- No public local UI exposure was created.
- No external writes, Zapier writes, HeyGen generation, SMB/Fork 2, Farmer execution, email send, Drive upload, OneDrive upload, or Telegram attachment send occurred.

- OpenClaw+ naming remains the runtime / skills / agents / mini-agent execution layer; no OpenCloud architecture layer was introduced.

Phase 2 Decision

Phase 2 remains BLOCKED / PARTIAL until an owner-authenticated browser session is available for a real visual smoke of Gateway -> Agent Hub -> SpaceAgent. Safe backend truth checks passed on the current production process.
