

Day 54 - Telegram Report Links Closure

Date: 2026-05-10T16:12:00Z

Branch: to-knowledge-mc

Base commit before Day 54: 293075d

Status: DEVELOPER-SIDE CLOSED / PUBLIC TELEGRAM LINK SEND GATED

Lane

Telegram report links and protected Mission Control report URLs.

What changed

- Added a protected report-link contract for Agent Zero reports.
- Added safe public-origin normalization so local/private origins are not sent as owner-facing public links.
- Added 'GET /api/bridge/agent-zero/reports/[id]/links'.
- Added 'report_links' to:
 - 'POST /api/bridge/agent-zero/reports'
 - 'GET /api/bridge/agent-zero/reports'
 - 'GET /api/bridge/agent-zero/reports/[id]'
- Added a Day 54 runtime guard script proving report links are auth-gated, local-safe, and free of raw paths/secrets.

Files changed

- 'src/lib/agent-zero-report-delivery.ts'
- 'src/lib/agent-zero-report-delivery.test.ts'
- 'src/app/api/bridge/agent-zero/reports/route.ts'
- 'src/app/api/bridge/agent-zero/reports/[id]/route.ts'
- 'src/app/api/bridge/agent-zero/reports/[id]/links/route.ts'
- 'scripts/check-telegram-report-links-guard.mjs'
- 'runtime/day-54-telegram-report-links-guard-smoke.json'
- 'runtime/day-54-route-rendering-smoke.json'
- 'runtime/day-54-telegram-report-links-closure.md'
- 'runtime/day-54-telegram-report-links-closure.pdf'

Routes changed or verified

- 'POST /api/bridge/agent-zero/reports'
- 'GET /api/bridge/agent-zero/reports'
- 'GET /api/bridge/agent-zero/reports/[id]'
- 'GET /api/bridge/agent-zero/reports/[id]/links'
- 'GET /api/bridge/agent-zero/reports/[id]/pdf'
- 'GET /api/bridge/agent-zero/reports/[id]/markdown'

UI and owner-facing behavior

- Owner-visible report responses now include 'report_links'.
- Link bundles mark:
 - 'auth_required: true'
 - 'protected: true'
 - 'raw_local_paths_exposed: false'
 - 'public_local_exposure: false'
- Local runtime origins such as '127.0.0.1' are rejected for public Telegram report links and reported as 'mission_control_public_url_required'.
- If a safe public Mission Control origin is available, the bundle can produce absolute HTTPS links.
- No Telegram message is marked sent by this lane.

Service/runtime behavior

- Local production-style runtime restarted on '127.0.0.1:3337'.
- Runtime PID after restart: '28918'.
- '/login' returned '200'.
- No public local exposure was added.
- No '.env' changes were made.
- No secrets were printed.
- No external Telegram send was attempted.

Proof artifacts

- 'runtime/day-54-telegram-report-links-guard-smoke.json'
 - 'ok: true'
 - checked: '6'
 - created report: '201'
 - unauthenticated links endpoint: '401'
 - authenticated links endpoint: '200'
 - PDF unauthenticated: '401'
 - Markdown unauthenticated: '401'
 - unsafe text detected: 'false'
- 'runtime/day-54-route-rendering-smoke.json'
 - 'ok: true'
 - failures: '0'

Tests and checks

- Red test verified missing helper first:
 - 'buildAgentZeroReportLinks is not a function'
 - 'normalizeMissionControlPublicOrigin is not a function'
- Focused tests:
 - 'pnpm exec vitest run src/lib/agent-zero-report-delivery.test.ts --pool=forks --no-file-parallelism --reporter verbose'
 - Result: '1 file / 8 tests passed'
- Script syntax:
 - 'node --check scripts/check-telegram-report-links-guard.mjs'
- Typecheck:
 - 'pnpm run typecheck'
- Build:
 - 'pnpm run build'
 - Build includes '/api/bridge/agent-zero/reports/[id]/links'
- Full tests:
 - 'pnpm test'
 - Result: '179 files / 1406 tests passed'
- Runtime guard:
 - 'node scripts/check-telegram-report-links-guard.mjs http://127.0.0.1:3337 runtime/day-54-telegram-report-links-guard-smoke.json'
- Route rendering:
 - 'node scripts/check-mission-control-route-rendering.mjs http://127.0.0.1:3337 > runtime/day-54-route-rendering-smoke.json'
- Diff whitespace:
 - 'git diff --check'
- Protected-file invariant:
 - 'node scripts/check-protected-file-invariants.mjs'
- '.env' diff:
 - clean

Blocker classification

- Developer-side implementation: 'NONE'
- Public Telegram report link send: 'OWNER_GATED' until owner-approved Telegram send scope exists.
- Absolute public report URL on local runtime: 'OWNER_GATED' / 'SERVICE_DOWN' until the request is served from the owner-approved public Mission Control origin.
- Telegram connector: 'CREDENTIAL_GATED' if Telegram credentials are not configured.

Safety confirmation

- No '.env' edits.
- No secret output.
- No auth weakening.
- No fake sent status.
- No fake Done.
- No raw local paths in report-link payloads.
- No public local origin exposed as a Telegram link.
- No Zapier writes.
- No SMB/Fork 2.
- No external farmers.

Rollback

Implementation rollback:

'git revert d32d471'

Commit and push

- Implementation commit: 'd32d471'
- Commit message: 'feat(telegram): add protected report links'
- Push result: pushed to 'origin/to-knowledge-mc'
- Report-only closeout update: pending at this report revision

Next day started

After Day 54 commit/push, continue automatically to Day 55: AgentMail readiness.
