Gateway UI Closeout 1 â Commit & Push

Date: 2026-05-08

Status: PASS

Scope

- Fixed the Gateway FULL v3 scroll/navigation trap in:
 - 'src/components/gateway/DesignerGatewayMockFrame.tsx'

Root Cause Confirmed

- Prior mount behavior used fixed viewport clipping and iframe viewport lock patterns that caused trapped/static page behavior.
- This closeout patch converts the frame mount to:
 - same-origin iframe auto-height sync (document height-driven),
 - explicit top-level exits ('Mission Control Home', 'Gateway Overview', 'Agent Hub'),
 - no designer token/class rewrite.

Verification Gates Run

1. 'git diff --check' -> pass
2. 'pnpm run typecheck' -> pass
3. 'pnpm run build' -> pass
4. 'pnpm test' -> pass ('138 files / 1251 tests')
5. secret scan:
 - 'node scripts/check-protected-file-invariants.mjs' -> pass
 - static token-pattern grep found only expected test fixtures in 'src/lib/__tests__/scan-credentials.test.ts'
6. '.env diff check' -> clean ('git status --porcelain -- .env*' returned no changes)

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.

Commit / Push

- Commit: 'fb7a480'
- Branch: 'to-knowledge-mc'
- Remote: 'origin/to-knowledge-mc'
- Push: completed ('origin/to-knowledge-mc' fast-forwarded to include 'fb7a480' and follow-up docs record '8ab2df7').

Rollback

- 'git revert fb7a480'
