Day 06 - SpaceAgent Playwright 100% Closure

Date: 2026-05-09

Branch: to-knowledge-mc

Lane: SpaceAgent Playwright MCP

Status: DEVELOPER-SIDE CLOSED - SERVICE_DOWN

Blocker class: SERVICE_DOWN

Primary blocker: playwright_mcp_service_unreachable

Closure Decision

Day 06 is closed for developer-side implementation because the Mission Control routes, status contract, proof packet, tests, and runtime smoke now report the Playwright MCP state truthfully.

This lane is not GO. The Playwright MCP service is not reachable from the Mission Control runtime context on 127.0.0.1:8931, so no live browser execution proof was claimed.

What Was Implemented

- Added a canonical SpaceAgent Playwright MCP closure proof packet.
- Added canonical status classification for Playwright MCP:
 - LIVE when the service is reachable and required tools are present.
 - SERVICE_DOWN when the local MCP service is unreachable.
 - BLOCKED when required tools are missing or unsupported.
 - CREDENTIAL_GATED when a credential-like blocker appears.
- Preserved read-only/local-only safety flags.
- Preserved no-write/no-execution defaults in the proof packet.
- Added test coverage for LIVE, SERVICE_DOWN, and BLOCKED classification.

Files Changed

- src/lib/playwright-mcp.ts
- src/lib/space-agent-browser-automation.test.ts

Routes / Endpoints Checked

- GET /api/bridge/playwright-mcp/status
- GET /api/bridge/space-agent/playwright-mcp/status
- POST /api/bridge/playwright-mcp/smoke
- POST /api/gateway/space-agent/playwright-mcp/evidence

UI Behavior

No UI layout changes were made in this lane.

SpaceAgent/Gateway surfaces can now consume a canonical Playwright MCP status and proof packet instead of inferring readiness from route existence.

Service / Runtime Behavior

Runtime proof was performed on loopback-only standalone Mission Control:

- Host bind: 127.0.0.1:3337
- Runtime PID: 13373
- /login: 200
- Unauthenticated GET /api/bridge/playwright-mcp/status: 401
- Authenticated GET /api/bridge/playwright-mcp/status: 503
- Authenticated GET /api/bridge/space-agent/playwright-mcp/status: 503
- Authenticated POST /api/bridge/playwright-mcp/smoke: 503
- Authenticated POST /api/gateway/space-agent/playwright-mcp/evidence: 503

Runtime result:

- canonical_status: SERVICE_DOWN
- blocker_class: SERVICE_DOWN
- blocker: playwright_mcp_service_unreachable

No public exposure was added. The standalone smoke used loopback only.

Tests Run

- pnpm test src/lib/space-agent-browser-automation.test.ts src/lib/space-agent-health.test.ts src/lib/space-agent-routes.test.ts src/lib/space-agent-browser-scenarios.test.ts src/lib/space-agent-end-to-end-research-flow.test.ts
- pnpm run typecheck
- git diff --check
- pnpm run build
- pnpm test
- node scripts/check-protected-file-invariants.mjs
- staged secret scan
- .env diff check

Validation result:

- Focused SpaceAgent / Playwright tests passed.
- Typecheck passed.
- Build passed.
- Full test suite passed: 139 files / 1261 tests.
- Protected-file invariant scan passed.
- Staged secret scan found no secret-like staged values.
- .env diff was clean.

Proof Artifact

The route smoke showed the correct protected behavior and truthful SERVICE_DOWN response for the Playwright MCP service. No fake browser proof or fake execution was claimed.

Remaining Blocker

playwright_mcp_service_unreachable

Required owner/admin or runtime action:

1. Install/start the approved Playwright MCP service on the Mission Control host.
2. Ensure the Mission Control runtime can reach it at 127.0.0.1:8931/mcp.
3. Re-run:
 - GET /api/bridge/playwright-mcp/status
 - POST /api/bridge/playwright-mcp/smoke
 - POST /api/gateway/space-agent/playwright-mcp/evidence

Safety Confirmation

- No .env changes.
- No secrets printed.
- No auth weakening.
- No public local exposure.
- No external writes.
- No fake browser execution proof.
- No raw local paths exposed in owner-facing output.

Commit / Push

Code commit:

- 576646ccbc330c37a7b8e03cd6388db9c5067d48
- Message: feat(space-agent): add playwright mcp closure proof packet

- Push result: pushed to origin/to-knowledge-mc

Report commit:

- Pending at report creation time.

Rollback

Rollback command:

```
““bash
git revert 576646ccbc330c37a7b8e03cd6388db9c5067d48
““
```

Next Day Started

Day 07 - SpaceAgent YouTube 100% Closure is automatically started after this Day 06 closeout.
