

Final 10-Day Mission Control Production GO Report

Executive Summary

The ecosystem is PARTIAL GO at 94%, not 100%. The campaign materially improved production truth: Mission Control was restarted and smoked, Agent Zero is proven as commander in API, Playwright MCP is GO local-only read-only, Pi is visible as a shadow dispatcher, mini-agent activation is correctly gated, route payload leaks were fixed, OpenClaw+ owner-facing Build-Wiki / Farmer naming was corrected, and full Mission Control plus OpenClaw+ validation passed.

100% is blocked by owner-authenticated visual proof, Hermes live adapter, Pi standalone runtime, Firecrawl credential/backend proof, YouTube transcript connector proof, Paperclip owner login/session bridge, Telegram live owner route proof/PDF attachment, external delivery connectors, Bridge Session execution approval, and OpenClaw+ doctor health.

Direct URLs

- Mission Control Tailnet URL: <http://100.116.35.95:3337>
- Agent Hub path: <http://100.116.35.95:3337/gateway/agent-hub>
- Paperclip Tailnet URL if owner session is available: <http://100.116.35.95:3100>

Final Result

PARTIAL GO, 94%. Not 100%.

Percentages

| System | Percent | Decision | Proof / blocker |

|---|---|---|---|

| Overall ecosystem | 94% | PARTIAL GO | Production is safer and more proven; hard blockers remain external or adapter-specific. |

| Gateway / Nucleus | 94% | PARTIAL GO | Registry, policy, audit, observability, button contracts, and protected auth smoke pass. |

| Agent Hub | 91% | PARTIAL GO | APIs prove five-agent control center; owner visual proof blocked. |

| Agent Zero | 94% | PARTIAL GO | Commander proof and test-chat pass; Telegram live owner prompt still needs external proof. |

| Hermes | 62% | NO-GO live | Service active and status route works; live test-chat blocked until safe adapter exists. |

| Pi Dispatcher | 45% | PARTIAL / SHADOW | Gateway shadow recommendations and routes proven; no standalone runtime. |

| SpaceAgent | 85% | PARTIAL GO | Playwright path and ResearchPacket pass; Firecrawl/YouTube limited. |

| Playwright MCP | 92% | GO local-only read-only | Local-only service active, status/smoke pass, public exposure blocked. |

| Firecrawl | 35% | BLOCKED | Credential/backend not proven for live SpaceAgent path. |

| YouTube Research | 48% | LIMITED | Metadata path only; transcript connector not proven. |

| Paperclip | 60% | PARTIAL / DEGRADED | Tailnet/local health visible; owner login and task bridge not proven. |

| OpenClaw+ | 89% | PARTIAL GO | Build/tests/gauntlet pass; doctor remains unhealthy. |

| Mini-agent OS | 82% | PARTIAL / GATED | Schema/proposal/unsafe rejection proven; execution remains Bridge-gated. |

| Build-Wiki / Farmer | 76% | PARTIAL / GATED | Timer active; literal opencloud-docs-farmer.service Run Now remains Bridge-gated; Fork 2 blocked. |

| Brain systems | 82% | PARTIAL / READ-ONLY | Read/status sanitized; writes gated. |

| Bridge / MCP / tools | 78% | PARTIAL / GATED | Discovery works; execution blocked without Bridge Session. |

| Models / providers | 76% | PARTIAL | Claude CLI and Ollama available; Codex CLI unavailable; external provider states vary. |

| AgentMail | 55% | PARTIAL / GATED | Status/dry-run route exists; outgoing send gated. |

| Telegram delivery | 55% | PARTIAL / GATED | Agent Zero route config exists; live owner route and PDF attachment proof blocked. |

| Google Drive | 45% | BLOCKED / CONNECTOR | Status can be inspected; report upload connector not configured. |

| OneDrive | 35% | BLOCKED / CONNECTOR | Connector not configured. |

| n8n | 15% | NOT INSTALLED | No install or workflow execution performed. |

| Zapier / HeyGen | 65% | READ-ONLY / GATED | Schemas/readiness visible; writes/generation blocked. |

| Security / auth | 95% | PARTIAL GO | Auth smoke, no leaks, no fake Done contracts pass; owner browser proof remains. |

| Database | 95% | GO | Mission Control integrity check ok and tables readable. |

| Scheduler / services | 90% | PARTIAL GO | Core services active; doctor issue and Paperclip degradation remain. |

| UI / browser | 82% | PARTIAL | API proof and previous screenshots exist; final owner browser visual proof unavailable. |

Routes Tested

| Route | Result | Proof |

|---|---|---|

| /api/gateway/status | 200 auth / 401 unauth | degraded status, no leaks |

/api/gateway/registry	200 auth / 401 unauth	registry visible, Pi included
/api/gateway/agent-hub/status	200 auth	Agent Hub status works
/api/bridge/agent-zero/status	200 auth / 401 unauth	Agent Zero visible
/api/bridge/agent-zero/test-chat	200 auth	agent_zero_called:true; no writes/execution
/api/bridge/hermes/status	200 auth / 401 unauth	Hermes status visible
/api/bridge/hermes/test-chat	503 auth	blocked: hermes_safe_live_chat_adapter_not_configured
/api/bridge/pi/status	200 auth / 401 unauth	shadow status
/api/gateway/nodes/pi	200 auth	Pi node visible
/api/bridge/playwright-mcp/status	200 auth / 401 unauth	connected local-only
/api/bridge/playwright-mcp/smoke	200 auth	status passed
/api/gateway/space-agent/browser/status	200 auth	browser panel status works
/api/gateway/space-agent/research	200 auth	ResearchPacket route works
/api/bridge/paperclip/status	200 auth / 401 unauth	blocked reason preserved
/api/openclaw/doctor	200 auth / 401 unauth	unhealthy but sanitized
/api/bridge/button-contracts	200 auth / 401 unauth	no-fake-button contract visible

Services Active

| Service | Status | Proof |

|---|---|---|

Mission Control standalone	active	PID 2817228; restarted May 8, 2026 00:21:12 EDT; Tailnet URL <http://100.116.35.95:3337>
claudeclaw.service	active	restarted Day 10; OpenClaw+ / Telegram runtime active
hermes-gateway.service	active	restarted Day 10; no new post-restart errors after short soak
playwright-mcp.service	active	restarted Day 10; local-only read-only status/smoke pass
Paperclip local/Tailnet process	active/degraded	reachable service URL <http://100.116.35.95:3100>; owner login not proven
opencloud-docs-farmer.timer	active	literal legacy timer only; owner-facing architecture is Build-Wiki / Farmer under OpenClaw+
opencloud-docs-farmer.service	inactive/success	literal legacy oneshot service; not manually started without Bridge approval

Tests And Gauntlets

- Mission Control typecheck PASS
- Mission Control production build PASS
- Mission Control full test suite PASS: 134 files, 1,241 tests
- OpenClaw+ typecheck/build PASS
- OpenClaw+ full suite PASS: 61 files, 1,215 tests, 4 skipped
- OpenClaw+ design-lock verify PASS
- OpenClaw+ gauntlet PASS: 370/370
- OpenClaw+ 100,000-scenario ecosystem gauntlet PASS
- Day 10 authenticated/unauthenticated route smoke PASS with leak_count 0

Commits

- Mission Control code: bc17959
- Mission Control Day 9 reports: b929e01
- OpenClaw+ code: e98e4f6
- Day 10 final report artifact commit: pending until this report pack is pushed.

Blockers

- owner_authenticated_browser_session_required: owner-authenticated UI screenshot/browser proof still unavailable to Codex.
- hermes_safe_live_chat_adapter_not_configured: Hermes status works, but test-chat returns hermes_called:false with 503.
- pi_runtime_session_not_proven: Pi is a proven Gateway shadow dispatcher, not a standalone runtime.
- firecrawl_credential_required / live adapter not proven for SpaceAgent.
- youtube_transcript_connector_not_proven: metadata path works, transcript proof remains limited.
- paperclip_owner_session_required / paperclip_auth_required_or_not_configured: service health exists, owner login/workforce bridge still degraded.
- telegram_owner_live_prompt_required: code route points to Agent Zero, but live owner prompt proof remains external; BotFather rename may still be needed.
- google_drive_upload_connector_not_configured and onedrive_upload_connector_not_configured.
- no_approved_telegram_document_attachment_route for Telegram PDF attachments.
- OpenClaw+ doctor still unhealthy: disabled plugin entries, auth/profile warning, stale legacy agent state, recent transcript gap, reverse-proxy header warning, exec security warning, and update notice.
- Bridge Session execution remains pending owner approval for writes, uploads, Run Now, and external sends.

Rollback Commands

- Mission Control code rollback: git revert bc17959
- Mission Control Day 9 report rollback: git revert b929e01
- OpenClaw+ code rollback: git revert e98e4f6
- Day 10 report rollback: git revert the Day 10 report artifact commit after it is created.

No-Secrets Confirmation

No tokens, API keys, passwords, auth files, environment variable values, or secret-shaped values are included. No environment files were modified. Artifact scans checked Markdown and PDF text layers for raw local paths, secret-shaped values, and stale architecture naming.

Safety Confirmation

No fake 100%, no fake Done, no fake live status, no fake buttons, no SMB/Fork 2, no Zapier write, no HeyGen generation, no external farmers, no auth weakening, no public local service exposure, no Docker socket to agents, and no raw root shell.

What Is Live

- Mission Control production standalone process is running latest pushed Mission Control code.
- Gateway protected APIs and registry routes work with auth and reject unauthenticated access.
- Agent Zero test-chat works and returns agent_zero_called:true.
- Playwright MCP is local-only and read-only with successful smoke.
- SpaceAgent can return safe ResearchPacket through Gateway.
- Pi is visible as shadow/advisory dispatcher.
- Mini-agent OS proposal path works and blocks activation without Bridge Session.
- Mission Control report link delivery works.

What Is Blocked

- owner_authenticated_browser_session_required: owner-authenticated UI screenshot/browser proof still unavailable to Codex.
- hermes_safe_live_chat_adapter_not_configured: Hermes status works, but test-chat returns hermes_called:false with 503.
- pi_runtime_session_not_proven: Pi is a proven Gateway shadow dispatcher, not a standalone runtime.
- firecrawl_credential_required / live adapter not proven for SpaceAgent.
- youtube_transcript_connector_not_proven: metadata path works, transcript proof remains limited.
- paperclip_owner_session_required / paperclip_auth_required_or_not_configured: service health exists, owner login/workforce bridge still degraded.
- telegram_owner_live_prompt_required: code route points to Agent Zero, but live owner prompt proof remains external; BotFather rename may still be needed.
- google_drive_upload_connector_not_configured and onedrive_upload_connector_not_configured.
- no_approved_telegram_document_attachment_route for Telegram PDF attachments.
- OpenClaw+ doctor still unhealthy: disabled plugin entries, auth/profile warning, stale legacy agent state, recent transcript gap, reverse-proxy header warning, exec security warning, and update notice.
- Bridge Session execution remains pending owner approval for writes, uploads, Run Now, and external sends.

Final Decision

PARTIAL GO, 94%. Do not claim 100% until all blockers above are cleared or formally owner-waived with proof.
