

Phase 13 - Delivery Connector Proof Report

Generated: 2026-05-07T21:11:29-04:00

Result

****PARTIAL GO / MISSION CONTROL REPORT LINK CONTRACT PASSED, EXTERNAL DELIVERY BLOCKED OR GATED****

Mission Control report delivery behavior is implemented and tested without exposing local paths. External delivery channels remain blocked or Bridge Session gated. No send, upload, attachment, or external write was executed.

Delivery Matrix

Delivery Path	Status	Reason
Mission Control report link	contract pass / authenticated proof pending	report link behavior tested; protected route needs owner session proof
Telegram PDF attachment	blocked	no_approved_telegram_document_attachment_route
AgentMail allowed-domain send	gated / blocked	Bridge Session and configured send adapter required
Google Drive upload	blocked	google_drive_upload_connector_not_configured
OneDrive upload	blocked	onedrive_upload_connector_not_configured

Credential Name Presence Check

Mission Control repo env names checked without printing values:

Connector	Env name present
AgentMail	no
Google Drive	no
OneDrive	no
Telegram	no

This does not inspect any external secret store; it only confirms Mission Control repo env names are not present.

Route Protection Smoke

Unauthenticated route checks after Mission Control restart:

Route	Result	Meaning
GET /api/reports	401	protected
GET /api/bridge/reports	401	protected
GET /api/bridge/telegram/send-report	401	protected
GET /api/bridge/agentmail/status	401	protected

GET /api/bridge/google-drive/status	401	protected
GET /api/bridge/onedrive/status	401	protected

Tests

Test	Result
src/lib/agent-zero-report-delivery.test.ts	6 passed
src/lib/agent-zero-google-drive-delivery.test.ts	3 passed
src/lib/gateway-security-proof.test.ts	4 passed
Combined focused tests	13 passed

Security Confirmation

- No fake Done.
- No Telegram attachment sent.
- No AgentMail send.
- No Google Drive upload.
- No OneDrive upload.
- No local server path exposed in owner-facing response contracts.
- No secrets printed.
- No `.env` changes.

Updated Percentage

System	Previous	Updated
Delivery connectors	45% PARTIAL / gated	48% PARTIAL / gated

Exact Remaining Blockers

- `owner\_authenticated\_report\_route\_proof\_required`
- `no\_approved\_telegram\_document\_attachment\_route`
- `agentmail\_send\_adapter\_or\_bridge\_session\_not\_proven`
- `google\_drive\_upload\_connector\_not\_configured`
- `onedrive\_upload\_connector\_not\_configured`

Exact Next Step

Use owner-authenticated Mission Control to prove report link retrieval. Then configure each external delivery adapter with a scoped Bridge Session before running any send/upload/attachment proof.

Rollback

This phase changed only reports. Rollback command after commit:

```
`git revert <phase-13-commit>`
```
