

Model / Provider Production Proof

Generated: 2026-05-07T22:22:15.991Z

Executive Result

Model/provider access is ****PARTIAL GO**** for registry and read-only discovery. Gateway can show model/provider status, but live Codex/Claude provider execution is blocked because the production PATH does not expose those CLIs. No billable model call was executed.

Production Route Evidence

Check	Result
---	---
Gateway data-layer getModels	200, read-only, execution false
Bridge providers	200, 8 providers visible
Gateway models node	200, read_only
Unauthenticated getModels	401
Codex CLI	unavailable on PATH
Claude CLI	unavailable on PATH
Ollama CLI	installed, version 0.20.4
NVIDIA CLI	unavailable on PATH

Credential Presence Booleans

Provider key	Present in checked process env
---	---
OPENROUTER_API_KEY	false
OPENAI_API_KEY	false
ANTHROPIC_API_KEY	false
GEMINI_API_KEY	false
GROQ_API_KEY	false

No key values were printed or inspected.

Provider Decision

Provider	Status	Notes
---	---	---
OpenRouter	registry-visible, live key not present in checked env	blocked for live call
OpenAI	registry-visible, live key not present in checked env	blocked for live call
Claude / Anthropic	CLI unavailable, API key absent	subscription/OAuth CLI proof required; API billing avoided
Codex / ChatGPT	CLI unavailable on production PATH	account auth cannot be smoke-tested yet
Ollama	CLI installed	local model path can be evaluated in later scoped smoke
NVIDIA / Groq / Gemini	not live-proven	blocked until configured/proven

Security Confirmation

- No model call was executed.
- No API key value was printed.
- No auth file was printed.
- No .env changes were made.
- No Anthropic API billing path was used.
- Unauthenticated model discovery route returned 401.

Completion Estimate

Component	Percent	Status
Registry/provider visibility	80%	live read-only routes
Auth protection	90%	unauthenticated blocked
Ollama CLI proof	70%	CLI installed, no model call
Codex CLI proof	0%	CLI unavailable
Claude CLI proof	0%	CLI unavailable
External provider live calls	0%	no keys/no calls
Model/provider overall	45%	PARTIAL GO

Remaining Blockers

Blocker	Impact	Exact Next Step
codex_cli_unavailable	Codex/ChatGPT plugin cannot be proven live.	Install/expose approved Codex CLI and run no-write smoke.
claude_cli_unavailable	Claude Code OAuth cannot be proven live.	Install/expose approved Claude CLI and run no-write smoke.
provider_keys_not_present_in_checked_env	OpenRouter/OpenAI/Gemini/Groq live calls cannot be proven from this runtime.	Configure approved secret source without printing values.

Final Decision

Models/providers: ****PARTIAL GO****.

Discovery works. Live provider execution remains blocked until CLI/auth or approved secret sources are configured and smoke-tested.
