

# Day 8 Phase 073 - AgentMail Incoming Proof

Generated: 2026-05-08 00:04 ET

## Objective

Prove AgentMail incoming/status visibility without sending mail.

## Proof

|                                                                                                                    |
|--------------------------------------------------------------------------------------------------------------------|
| Check   Route   Result   Decision                                                                                  |
| ---   ---   ---   ---                                                                                              |
| Gateway node   GET /api/gateway/nodes/integration_agentmail   200   PARTIAL GO metadata visible                    |
| Notification delivery status   GET /api/notifications/deliver   200   Incoming/pending notification counts visible |
| Pending notifications   statistics returned 32 undelivered   PARTIAL visibility only                               |
| External send   not attempted   safe                                                                               |

## Decision

PARTIAL GO. AgentMail appears as a Gateway delivery node and notification metadata is readable. This is not proof of external AgentMail inbound mailbox integration.

## Commands And Routes Used

- POST /api/bridge/agent-zero/reports.
- GET /api/bridge/agent-zero/reports/<report-id>, /markdown, and /pdf.
- GET /api/bridge/agent-zero/google-drive/status.
- POST /api/bridge/agent-zero/google-drive/upload-report with no active Bridge Session.
- GET /api/bridge/agent-zero/onedrive/status.
- POST /api/bridge/agent-zero/onedrive/upload-report with no active Bridge Session.
- GET /api/gateway/nodes/integration\_agentmail.
- GET and dry-run POST /api/notifications/deliver.
- GET /api/bridge/zapier/status and GET /api/bridge/zapier/tools?q=heygen.
- GET and POST /api/bridge/agent-zero/bridge-session.

## Tests And Validation

---

- Focused delivery/security tests: passed, 4 files and 16 tests.
- Authenticated route smoke: passed for Day 8 delivery surfaces.
- Unauthenticated route smoke: 401 for protected Day 8 routes.
- Raw path / secret-shape scan over Day 8 delivery route payloads: 0 leaks.
- External sends/uploads/generation: 0 executed.

## Services

---

- Mission Control standalone: active after Day 7 restart.
- Playwright MCP service: active local-only; not used for Day 8 delivery writes.
- Hermes gateway service: active but Hermes live chat remains separately blocked.

## Commits And Rollback

---

- Commit: pending Day 8 report commit at generation time.
- Rollback command after commit: git revert <day-8-report-commit-hash>.

## Updated Percentage Snapshot

---

- Mission Control report link delivery: 95% GO local authenticated link.
- Telegram PDF attachment: 35% BLOCKED / gated.
- AgentMail: 45% PARTIAL / incoming metadata visible, send blocked.
- Google Drive: 55% PARTIAL / tools visible, upload blocked.
- OneDrive: 30% BLOCKED / upload connector not configured.
- Zapier: 65% PARTIAL GO read-only inventory.
- HeyGen through Zapier: 55% PARTIAL GO read-only discovery; generation blocked.
- Bridge Session: 55% PARTIAL / pending approval created, execution disabled.
- Delivery connectors overall: 55% PARTIAL / gated.
- Overall ecosystem: 93% PARTIAL GO.

## No-Secrets Confirmation

---

No secret values, API keys, auth files, tokens, passwords, .env contents, or raw absolute local paths are included in this report. No .env file was modified.

## Exact Next Step

---

Add a dedicated AgentMail inbox/status adapter before claiming incoming AgentMail GO.
