

Day 8 Phase 079 - Bridge Session Lifecycle

Generated: 2026-05-08 00:04 ET

Objective

Prove one safe scoped Bridge Session path or record exact blocker.

Proof

Step	Result	Decision
---	---	---
GET Bridge Session	200; previous session expired	No active execution
POST Bridge Session	201; pending_approval created/reused	PARTIAL GO approval request
Execution enabled	false	No protected execution allowed
Writes enabled	false	No writes allowed
Expiration	pending session has expiration timestamp	Lifecycle metadata visible
Outside-scope actions	delivery upload routes returned blocked	blocked as expected

Blocker

bridge_session_owner_approval_pending. No safe action was executed because approval_state was not active/approved.
