

Day 33 â Build-Wiki / Farmer Run Now 100% Closure

Date: 2026-05-09

Lane: Build-Wiki/Farmer Run Now

Status: CLOSED WITH SERVICE_DOWN

Blocker classification: SERVICE_DOWN

Exact blocker: 'buildwiki_run_now_systemctl_failed'

What Was Implemented

- Added a regression assertion that the persisted Run Now approval scope is exact and locked:
 - action: 'buildwiki.run_now'
 - target service: 'opencloud-docs-farmer.service'
 - command: 'systemctl --user start opencloud-docs-farmer.service'
 - Fork 1 only
 - no SMB
 - no Fork 2
 - no external farmers
 - no second vault
 - no immediate execution
- Verified the existing Run Now implementation remains approval-first:
 - Request run creates approval.
 - Approval pending is visible.
 - Owner approval dispatches only the exact service command.
 - Failed service dispatch records failed run state and audit.
 - UI/status surfaces show failed rather than fake completion.

Files Changed

- 'src/app/api/bridge/brain-sync/build-wiki/run-now/route.test.ts'
- 'runtime/day-33-buildwiki-farmer-run-now-proof.json'
- 'runtime/day-33-buildwiki-farmer-run-now-100-closure.md'
- 'runtime/day-33-buildwiki-farmer-run-now-100-closure.pdf'

Routes / Endpoints Verified

- 'GET /api/bridge/brain-sync/build-wiki/status'
- 'GET /api/bridge/brain-sync/build-wiki/run-now'
- 'GET /api/bridge/brain-sync/build-wiki/run-now/[id]'
- 'POST /api/bridge/brain-sync/build-wiki/run-now'
- 'POST /api/bridge/approval-requests/[id]/approve'
- 'POST /api/bridge/brain-sync/build-wiki/run-now/[id]/dispatch'

UI Behavior

Owner-facing Build-Wiki/Farmer Run Now state is truthful:

- 'run_now.ui_state': 'failed'
- 'run_now.run_state': 'failed'
- 'run_now.approval_state': 'approved'
- dispatch surface: 'approval_route_exact_scope_dispatch'
- target service: 'opencloud-docs-farmer.service'
- controls:
 - Run Now: 'OWNER_APPROVAL_REQUIRED'
 - Pause sync: not wired in this hop
 - Resume sync: owner approval required
 - Add local source: owner approval required
 - External farmer: credential required
 - Logs/raw/wiki views: read-only

No fake Run Now success is shown.

Service / Runtime Proof

Local Mission Control standalone runtime:

- Bind: '127.0.0.1:3337'
- '/login': '200'
- unauthenticated Build-Wiki status route: '401'
- authenticated Build-Wiki status route: '200'
- authenticated Run Now read route: '200'
- authenticated Run Now id route: '200'

Run Now proof:

- target service: 'opencloud-docs-farmer.service'
- UI state: 'failed'
- run state: 'failed'
- no SMB/Fork 2 enabled: 'true'
- exact scope proven by Day 32 dispatch proof: 'true'
- failed run recorded by Day 32 dispatch proof: 'true'
- successful dispatch covered by test: 'true'
- unsafe output detected: 'false'

Proof artifact:

- 'runtime/day-33-buildwiki-farmer-run-now-proof.json'

Tests Run

- 'pnpm test 'src/app/api/bridge/brain-sync/build-wiki/run-now/route.test.ts''
 - PASS: 1 file / 3 tests
- 'pnpm run typecheck'
 - PASS
- 'pnpm run build'
 - PASS
- 'pnpm test'
 - PASS: 156 files / 1324 tests
- 'git diff --check'
 - PASS
- 'node scripts/check-protected-file-invariants.mjs'
 - PASS
- '.env' diff check
 - PASS, no '.env' changes

Remaining Blocker

'SERVICE_DOWN': the exact 'opencloud-docs-farmer.service' command cannot complete in this runtime.

The app-side Run Now lane is closed because:

- request creation is implemented and tested
- approval-first behavior is implemented and tested
- exact service scope is implemented and tested
- no-SMB/Fork 2/external-farmer constraints are asserted
- failed dispatch/audit is proven live
- success dispatch is covered by test
- UI/status surfaces show the failure truthfully

Owner/admin action to move from service-down to live success:

- Run the proof on the runtime host where 'systemctl --user start opencloud-docs-farmer.service' is available to the Mission Control service user.

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.

- No SMB / Fork 2 / external farmers.
- No second vault.
- No Zapier writes.
- No HeyGen generation.
- No broad connector execution.
- No fake Run Now success.
- No raw local paths exposed in proof/report artifacts.

Commit / Push

Day 33 source/report commit:

- this commit

Push:

- pending commit and push

Rollback

Source/report rollback:

```
""bash
git revert <day33_commit_sha>
""
```

Next Day Started

Day 34 â Farmer Service Status 100% Closure starts automatically after this report is committed and pushed.
