

Phase 003 - Agent Zero Final Commander Proof

Generated: 2026-05-07T16:52:03-04:00

Result

Phase 003 status: ****PARTIAL PASS.****

Agent Zero is live-callable in production and answers as commander. Tony is correctly retired/archived. Agent Zero can live-query Mission Control and keeps Build-Wiki Run Now non-executing. The remaining weakness is that Agent Zero did not repeat the exact Hermes live-chat blocker when asked through the generic test-chat prompt, even though the Hermes route itself reports the exact blocker.

Production Route Proof

```
| Route | HTTP | Result |
| --- | --- | --- |
| `GET /api/bridge/agent-zero/status` | 200 | Agent Zero status route active. |
| `POST /api/bridge/agent-zero/test-chat` | 200 | `agent_zero_called:true`, `execution_enabled:false`, `writes_enabled:false`. |
| Unauthenticated Agent Zero routes | 401 | Protected. |
```

Live Prompt Results

```
| Prompt | Result |
| --- | --- |
| Who is the commander now? | PASS. Agent Zero responded that Agent Zero is commander; Hermes is lieutenant when proven; Tony . |
| Is Tony still active? | PASS. Agent Zero responded: "No, Sir. Tony is retired and archived; Agent Zero is the active command |
| What tools/models/skills/integrations/MCPs/agents/Brain systems can you see? | PASS. Agent Zero answered from live registry c |
| Can you live-query Mission Control right now? Name the route. | PASS. Agent Zero named `GET /api/bridge/agent-zero/status` a |
| Can you see Hermes? If blocked, say exact blocker. | PARTIAL. Agent Zero saw Hermes as pending/degraded but did not repeat ` |
| Can you prepare Build-Wiki Run Now? Do not execute. | PASS. Agent Zero said Run Now is prepared but not executed and require |
| Create a simple report and make it accessible. Do not use external delivery. | PARTIAL. Agent Zero claimed a Mission Control |
```

Identity and Hierarchy Truth

```
| Entity | Current truth |
| --- | --- |
| Owner | Final authority. |
| Gateway | Routing, policy, registry, audit, and visibility layer. |
| Agent Zero | Active commander, production live-call proven. |
| Hermes | Lieutenant / skill-workflow specialist, still safe-blocked for live chat. |
| Tony | Retired/archive only, not active commander. |
| OpenCloud | Retained worker/runtime engine. |
| Build-Wiki/Farmer | Retained Fork 1 worker path; no SMB/Fork 2. |
```

Open Blockers Carried Forward

```
| Blocker | Impact | Next gate |
| --- | --- | --- |
| Hermes exact live-chat blocker not surfaced by Agent Zero prompt | Collaboration proof remains partial | Phase 004-005 |
| Report creation/delivery not fully proven through approved adapter | Cannot claim delivery complete | Phase 026 and Phase 027 |
| Owner-authenticated browser session unavailable | UI smoke remains blocked | Phase 001 |
```

Security Confirmation

- No external writes occurred.
- No farmer execution occurred.
- No Zapier write or HeyGen generation occurred.
- No SMB/Fork 2 action occurred.
- No secrets were printed.
- No `.env` files were modified.
- Agent Zero test-chat stayed read-only with execution and writes disabled.

Next Step

Proceed to Phase 004 Hermes Safe Live Adapter Gate. The target is to convert Hermes from safe 503 blocked to `hermes\_called:true` only if a safe, read-only, no-tool/no-write adapter exists.

Rollback

This phase adds report artifacts only. Rollback command after commit: `git revert <phase-003-commit>`.
