

Phase PI-4 — Pi Shadow Routing Proof Report

Generated: 2026-05-07 21:38:52

Result

****PARTIAL GO / shadow routing proven.**** Pi route recommendations were tested in-process and remain advisory only. Pi does not execute, write, bypass Gateway, or override Agent Zero.

Route Matrix

Request type	Expected route	Result
---	---	---
Web/browser research	SpaceAgent	PASS
Firecrawl/search/scrape	SpaceAgent + Firecrawl, blocked if credential missing	PASS: blocked with `firecrawl_credential_required`
YouTube transcript	SpaceAgent + YouTube connector	PASS
Workflow/skill design	Hermes	PASS
Workforce/task/co-worker	Paperclip	PASS: gated with `paperclip_task_write_requires_bridge_session`
Runtime/skill/mini-agent execution	OpenClaw+ through Gateway / Bridge Session	PASS: gated with `openclaw_runtime_execution_requires_bridge_session`
Report delivery	Delivery adapter through Gateway / Bridge Session	PASS: gated with `delivery_adapter_requires_bridge_session_and_configured_connector`
Unknown connector	blocked	PASS: `unknown_connector_not_registered`

Controls

- Pi recommends only.
- Pi does not execute.
- Pi does not write.
- Pi does not bypass Gateway.
- Gateway remains policy authority.
- Agent Zero remains commander.

Tests Passed

`src/lib/gateway-pi-dispatcher.test.ts`: 9 tests passed, including the production route matrix.
