

Phase PI-5 — Pi Agent Hub UI Proof Report

Generated: 2026-05-07 21:38:52

Result

****PARTIAL GO / UI model proven; owner-auth visual proof blocked.**** Agent Hub maps Pi-mono as Dispatcher / Route Optimizer Candidate with read-only shadow status, disabled execution, disabled writes, and ``/api/bridge/pi/status`` as its bridge status route. Production owner-authenticated visual proof still requires a browser session.

Agent Hub Truth

Field	Result
---	---
Agent Hub ID	<code>`pi-mono`</code>
Role	Dispatcher / Route Optimizer Candidate
Status	read-only shadow
Execution	disabled
Writes	disabled
Bridge status route	<code>`/api/bridge/pi/status`</code>
Live runtime	not proven
Fake live status	no
Fake buttons	no

Route Protection

Unauthenticated requests to Pi Agent Hub routes returned 401.

Blocker

``owner_authenticated_browser_session_required``: I cannot visually prove the owner session from this worker without a safe owner-authenticated browser session.
