

Agent Hub Functional Control Center Report

Status: LOCAL PARTIAL GO - production visibility still requires deploy/owner confirmation.

Scope Completed

- Converted Agent Hub access behavior from raw link inventory toward an owner control center.
- Added human-readable Gateway control surfaces:
 - ``/gateway/tools``
 - ``/gateway/brain``
 - ``/gateway/agent-hub/agent-zero/config``
 - ``/gateway/agent-hub/agent-zero/chat``
 - ``/gateway/agent-hub/hermes/config``
 - ``/gateway/agent-hub/hermes/chat``
 - ``/gateway/agent-hub/pi/config``
 - ``/gateway/agent-hub/pi/recommend``
 - ``/gateway/agent-hub/spaceagent/config``
 - ``/gateway/agent-hub/spaceagent/research``
 - ``/gateway/agent-hub/paperclip/config``
 - ``/gateway/agent-hub/openclaw/config``
- Kept JSON endpoints as machine APIs. Owner buttons now navigate to readable Gateway pages instead of opening raw JSON dumps.
- Updated action routing:
 - Open UI uses safe external opens for real owner URLs.
 - Open Config uses agent-specific Gateway pages.
 - Open Brain uses the Gateway brain page or a blocker.
 - Open Chat/Recommend/Research uses implemented control pages.
 - Open Tools uses ``/gateway/tools``.
 - Health uses readable control pages backed by JSON fetches.
- Protected execution verbs remain Bridge-gated.

Agent Results

Agent/surface	Owner UI behavior	Config/status behavior	Current truthful status
Agent Zero	Opens <code>`http://100.116.35.95:50080/`</code> in a new tab	<code>`/gateway/agent-hub/agent-zero/config`</code>	Partial, UI restored, fd guard pending
Hermes	No public UI exposed	<code>`/gateway/agent-hub/hermes/config`</code> and <code>`/gateway/agent-hub/hermes/chat`</code>	Partial, local service/adaptor proven, owner proxy not wired
Pi	No fake standalone UI	<code>`/gateway/agent-hub/pi/config`</code> and <code>`/gateway/agent-hub/pi/recommend`</code>	Advisory, runtime not proven
SpaceAgent	No fake standalone UI	<code>`/gateway/agent-hub/spaceagent/config`</code> and <code>`/gateway/agent-hub/spaceagent/research`</code>	Partial, Mission Control panel only, Playwright local-only
Paperclip	Opens <code>`http://100.116.35.95:3100/`</code> in a new tab	<code>`/gateway/agent-hub/paperclip/config`</code>	Partial, Tailnet UI reachable, owner company claim required
OpenClaw+	Uses existing owner tunnel <code>`http://127.0.0.1:18789/`</code>	<code>`/gateway/agent-hub/openclaw/config`</code>	Tunnel live, doctor CLI blocked
Firecrawl	No fake UI	Status visible through SpaceAgent/tools surfaces	Blocked by credential/backend
YouTube	No fake UI	Status visible through SpaceAgent/tools surfaces	Limited/blocked until transcript proof
Delivery connectors	No fake UI	Readiness/status only	Sends/uploads remain Bridge-gated and credential-gated

Files Changed

- `gateway-dropin/next.config.mjs`
- `gateway-dropin/src/app/gateway/page.tsx`
- `gateway-dropin/src/components/gateway/GatewayShell.tsx`
- `gateway-dropin/src/components/gateway/gateway-actions.ts`
- `gateway-dropin/src/components/gateway/gateway-status-contracts.ts`
- `gateway-dropin/tests/gateway-shell.test.ts`
- `gateway-dropin/tests/gateway-status-contracts.test.ts`

Validation

- `git diff --check`: passed.
- `pnpm run typecheck`: passed.
- `pnpm run build`: passed.
- `pnpm --dir gateway-dropin run typecheck`: passed.
- `pnpm --dir gateway-dropin run build`: passed.
- `pnpm --dir gateway-dropin test`: passed, 48 tests.
- `pnpm run safety:ui-actions`: passed.
- `pnpm --dir gateway-dropin run design-lock:verify`: passed.
- Protected-file invariant scan: passed.
- `.env` diff check: passed.
- Scoped secret scan on changed files: passed.

Note: root `pnpm test` is not available in this repository because the root package has no `test` script.

Local Commit

Commit: pending at report creation time.

Remaining Blockers

- Production Mission Control must be deployed/restarted with this commit before the owner can see it in the browser.
- Paperclip company access still requires an official owner company membership/claim/bootstrap path.
- Hermes owner proxy/chat remains a safe Mission Control panel, not a public local service.
- Pi runtime is not proven and is intentionally not faked.
- Firecrawl, YouTube, and delivery connector live execution remain credential/backend/OAuth gated.

Final Local Recommendation

Ship this scoped commit to Mission Control production, then have the owner retarget `/gateway/agent-hub` and the new control pages. Do not call final GO until the owner confirms the production browser shows the fixed Agent Control Center.
