Day 87 â Responsive Design

Lane

Mission Control / Gateway / Agent Hub / Bridge responsive shell.

Status

Developer-side responsive closure complete. Owner-authenticated visual proof remains owner-gated because no owner browser session was available in this runtime.

What Was Implemented

- Preserved the approved designer Gateway mock HTML/CSS/class names without editing mock files.
- Kept the fixed-width 'Agent Hub.html' and 'Paperclip.html' surfaces mounted as raw static assets.
- Added narrow-screen Mission Control shell rules so the outer document no longer creates global horizontal overflow.
- Converted the Workspace rail into an internal horizontal scroller on tablet/mobile.
- Kept the Gateway sub-rail to the left of the iframe and preserved the 1480px designer surface inside the Mission Control page scroll area.
- Added a regression test asserting the responsive shell behavior and fixed-width mock contract.

Files Changed

- 'public/designer-mission-control/styles.css'
- 'public/designer-mission-control/src/gateway/GatewayShell.jsx'
- 'src/lib/mission-control-shell.test.ts'
- 'runtime/day-87-responsive-design/*'

Routes / Endpoints Changed

- No API routes changed.
- Existing protected shell route verified through '/designer-mission-control/Mission Control.htm?page=gateway&tab=agent-hub'.
- Existing Gateway deep-link flow remains '/gateway?tab=agent-hub'.
- Existing raw design asset remains '/design/gateway/Agent Hub.html'.

UI Behavior

- Desktop still shows the mounted Gateway frame with the approved designer layout.
- Tablet/mobile no longer create global document horizontal overflow from Mission Control topbar chrome.
- Tablet/mobile keep intentional horizontal scrolling inside 'main.main-solo' for the fixed 1480px approved mock.
- Workspace rail scrolls horizontally inside the shell on narrow screens.
- No fake buttons were added.
- No mock HTML, CSS, or class names were modified.

Service / Runtime Behavior

- Local proof server used: 'http://127.0.0.1:3341'.
- Runtime proof was local-only and not publicly exposed.
- No production restart was performed for this Day87 package.

Tests Run

- 'git diff --check' â pass.
- '.env' status check â pass, no '.env' changes.
- 'pnpm run typecheck' â pass.
- 'pnpm run build' â pass.
- 'pnpm test' â pass, 202 files and 1501 tests.
- 'node scripts/protected-route-smoke-contract.mjs http://127.0.0.1:3341' â pass, 44 routes checked.
- 'node scripts/authenticated-route-smoke-contract.mjs http://127.0.0.1:3341' â pass as owner-gated harness, no cookie value stored.
- 'node scripts/check-protected-file-invariants.mjs' â pass.
- 'node scripts/secret-scan-contract.mjs' â pass.
- 'node scripts/raw-exposure-scan-contract.mjs' â pass.

Proof Artifact

- 'runtime/day-87-responsive-design/responsive-proof-after.json'
- 'runtime/day-87-responsive-design/after-desktop.png'
- 'runtime/day-87-responsive-design/after-tablet.png'
- 'runtime/day-87-responsive-design/after-mobile.png'
- 'runtime/day-87-responsive-design/protected-route-smoke.json'
- 'runtime/day-87-responsive-design/authenticated-route-smoke.json'
- 'runtime/day-87-responsive-design/secret-scan.json'
- 'runtime/day-87-responsive-design/raw-exposure-scan.json'

Proof Assertions

- Desktop Gateway frame visible: true.
- Tablet document has no global horizontal overflow: true.
- Mobile document has no global horizontal overflow: true.
- Tablet main scroll contains intentional fixed mock overflow: true.
- Mobile main scroll contains intentional fixed mock overflow: true.
- Mobile Workspace rail scrolls horizontally inside shell: true.
- Mobile frame preserves designer width of 1480px: true.
- Raw Agent Hub asset loaded: true.

Remaining Blocker

Owner-authenticated visual proof requires a real owner browser session. The authenticated smoke harness is complete and reported 'OWNER_GATED' without storing or printing cookie values.

Exact Blocker Classification

OWNER_GATED

Rollback Command

'git revert <day-87-commit>'

Commit Hash

Pending until commit is created.

Push Result

Pending until push completes.

Next Day

Day 88 â Accessibility Pass starts automatically after Day87 commit and push.
