

Day 1 Production Progress Report

Generated: 2026-05-08

Objective

Day 1 goal: freeze the truth, prove Mission Control production is running the latest code, smoke the protected routes, attempt owner-authenticated visual proof, and audit UI/API security hygiene before committing report artifacts.

Executive Result

****PARTIAL GO, 90% overall.**** Production is running the latest pushed code and the restarted Mission Control process passed authenticated and unauthenticated route smoke. The deployed Gateway / Agent Hub designer work is present at the route /API level, and the live button contract probe is clean. True owner-authenticated browser visual proof remains blocked because no owner-authenticated browser session is available in this Codex environment.

No fake 100% claim is made.

Day 1 Phase Summary

Phase	Status	Key proof	Blocker
Phase 1	PASS / PARTIAL GO	Master state reconciliation table created; Pi included; OpenClaw+ naming corrected	Hard blockers remain
Phase 2	PASS / PARTIAL GO	Mission Control restart and smoke; new PID and timestamp; route smoke passed	Production process restarted; Hermes test-chat still blocked
Phase 3	BLOCKED / PARTIAL	Owner browser proof evidence exists	Route-level and temp-admin blocked by <code>`owner_authenticated_browser_session_required`</code>
Phase 4	PASS / PARTIAL GO	UI/API security hygiene; strict leak scan zero hits	Static/live button contracts clean; Host/security hardening items remain
Phase 5	PASS / PARTIAL	Day 1 validation and push; route smoke, leak scan completed	Typecheck, build, tests blocked by <code>`pnpm`</code> command; direct validation passed

Reports Produced

Report	Status
<code>`runtime/day-01-phase-01-master-state-reconciliation.md`</code>	Created
<code>`runtime/day-01-phase-01-master-state-reconciliation.pdf`</code>	Created
<code>`runtime/day-01-phase-02-mission-control-restart-smoke.md`</code>	Created
<code>`runtime/day-01-phase-02-mission-control-restart-smoke.pdf`</code>	Created
<code>`runtime/day-01-phase-03-owner-browser-proof.md`</code>	Created
<code>`runtime/day-01-phase-03-owner-browser-proof.pdf`</code>	Created
<code>`runtime/day-01-phase-04-ui-api-security-hygiene.md`</code>	Created
<code>`runtime/day-01-phase-04-ui-api-security-hygiene.pdf`</code>	Created
<code>`runtime/day-01-production-progress-report.md`</code>	Created
<code>`runtime/day-01-production-progress-report.pdf`</code>	Created

Production Restart Proof

Item	Result
Latest production HEAD	<code>`db918dc`</code>
Local HEAD	<code>`db918dc`</code>
Previous production PID	<code>`3248542`</code>
New production PID	<code>`3254632`</code>

```
| Previous start timestamp | Fri May 8 08:24:02 2026 |
| New start timestamp | Fri May 8 08:28:23 2026 |
| Production bind | local-only Mission Control bind with Tailnet proxy |
| Public login route | 200 |
| `.env` changes | None |
| Log secret-pattern count | 0 in checked restart log window |
```

Route Smoke Proof

Authenticated route smoke:

```
| Route | Result |
| --- | --- |
| `GET /api/gateway/status` | 200 |
| `GET /api/gateway/registry` | 200 |
| `GET /api/gateway/agent-hub/status` | 200 |
| `GET /api/bridge/agent-zero/status` | 200 |
| `POST /api/bridge/agent-zero/test-chat` | 200 with `agent_zero_called:true` |
| `GET /api/bridge/hermes/status` | 200 |
| `POST /api/bridge/hermes/test-chat` | 503 with `hermes_safe_live_chat_adapter_
not_configured` |
| `GET /api/bridge/pi/status` | 200 |
| `GET /api/bridge/playwright-mcp/status` | 200 |
| `GET /api/bridge/paperclip/status` | 200 |
| `GET /api/gateway/space-agent/browser/status` | 200 |
```

Unauthenticated protected route smoke returned 401 for the checked protected route families.

UI / Button Proof

```
| Check | Result |
| --- | --- |
| Static button route contract | PASS |
| Live production button contract | PASS |
| Live endpoints checked | 52 |
| Skipped endpoints | 1 allowed missing stream endpoint |
| Missing route files | 0 |
| Fake Run Now regression | Fixed and verified: Build-Wiki Run Now returns 423 without Bridge Session |
| Zapier writes | Gated |
| HeyGen/video generation | Gated/blocked |
| Firecrawl | Blocked, no fake connected state |
```

Security / Leak Proof

```
| Check | Result |
| --- | --- |
| Strict primary API leak scan | 0 secret/path hits |
| Strict extended API leak scan | 0 secret/path hits |
| Agent Hub Tony active label scan | 0 hits |
| Agent Hub OpenCloud architecture label scan | No architecture label; literal legacy service tokens only |
| CSP/security headers on login | Present |
| Built-in security scan | 72/100, PARTIAL |
```

Non-passing built-in security scan IDs:

```
| Category | IDs |
| --- | --- |
| Credentials | `auth_pass` |
| Network | `hsts_enabled` |
```

```
| OpenClaw+ | `exec_restricted`, `tools_deny_list`, `sandbox_mode` |
| Runtime | `backup_recent`, `receipt_signing` |
| OS | `firewall`, `open_ports`, `disk_encryption`, `linux_core_dumps`, `linux_m
ac_framework`, `linux_tmp_noexec` |
```

No auth weakening or host hardening changes were applied automatically.

Validation

```
| Gate | Command / Method | Result |
| --- | --- | --- |
| Whitespace diff check | `git diff --check` | PASS |
| TypeScript | direct `tsc --noEmit` after Node version check | PASS |
| Build | direct Next production build after Node version check | PASS |
| Tests | direct Vitest run after Node version check | PASS, 136 files / 1244 te
sts |
| Local dependency repair | `npm rebuild better-sqlite3 --build-from-source` | P
ASS, repaired local native binding only |
| `pnpm run typecheck` | attempted via Corepack | BLOCKED by local pnpm build-ap
proval guard |
| Live route smoke | production authenticated/unauthenticated smoke | PASS/PARTI
AL |
| Live button route smoke | production button contract probe | PASS |
| Strict API leak scan | production payload scan | PASS |
```

The direct validation commands were used because Corepack selected pnpm 11, whic h refused to run scripts until package build approvals are configured. No packag e files were committed from that local tool issue.

Files Changed

Report files only:

```
- `runtime/day-01-phase-01-master-state-reconciliation.md`
- `runtime/day-01-phase-01-master-state-reconciliation.pdf`
- `runtime/day-01-phase-02-mission-control-restart-smoke.md`
- `runtime/day-01-phase-02-mission-control-restart-smoke.pdf`
- `runtime/day-01-phase-03-owner-browser-proof.md`
- `runtime/day-01-phase-03-owner-browser-proof.pdf`
- `runtime/day-01-phase-04-ui-api-security-hygiene.md`
- `runtime/day-01-phase-04-ui-api-security-hygiene.pdf`
- `runtime/day-01-production-progress-report.md`
- `runtime/day-01-production-progress-report.pdf`
```

No source code changed during Day 1.

Blockers Remaining

```
| Blocker | System | Exact next step |
| --- | --- | --- |
| `owner_authenticated_browser_session_required` | Owner UI proof | Re-run brows
er visual proof from owner-auth session |
| `hermes_safe_live_chat_adapter_not_configured` | Hermes | Build safe no-tool/n
o-write Hermes adapter and prove `hermes_called:true` |
| `firecrawl_credential_required` | SpaceAgent / Firecrawl | Configure approved
credential source and run one read-only smoke |
| `youtube_transcript_connector_not_proven` | SpaceAgent / YouTube | Prove trans
cript/metadata connector without bypassing restrictions |
| `paperclip_owner_session_required` | Paperclip | Prove owner login, dashboard,
roster, and task queue |
| `production_security_scan_hardening_items_remain` | Security / host | Review a
nd safely remediate credential, network, runtime, and OS hardening items |
```

| `legacy\_buildwiki\_file\_title\_contains\_opencloud` | Build-Wiki / Farmer | Clean
legacy content label through approved Build-Wiki content path |

Updated Percentages

System	Updated %	Status
Agent Zero	93%	PARTIAL GO
Hermes	42%	NO-GO live
Pi Dispatcher	72%	PARTIAL GO / SHADOW
Gateway / Agent Hub	90%	PARTIAL GO
SpaceAgent	82%	PARTIAL GO
Playwright MCP	93%	GO local-only read-only
Firecrawl	35%	BLOCKED
YouTube Research	70%	PARTIAL / LIMITED
Paperclip	62%	PARTIAL / DEGRADED
OpenClaw+	86%	PARTIAL GO
Mini-Agent OS	76%	PARTIAL / GATED
Build-Wiki / Farmer	74%	PARTIAL / GATED
Brain systems	70%	PARTIAL GO
Bridge / MCP	74%	PARTIAL / GATED
Delivery connectors	50%	PARTIAL / GATED
Bridge Session	68%	PARTIAL GO
Security / No-Fake UI	88%	PARTIAL GO
Overall ecosystem	90%	PARTIAL GO

Commits

No commit hash yet at report generation time. The Day 1 reports will be committed in an isolated docs commit after staged secret scan.

Rollback

If the Day 1 report commit needs to be reverted:

```
`git revert <day-1-report-commit>`
```

If the production process needs to roll back code, use the previous production rollback procedure from the latest production hardening report.

No-Secrets Confirmation

- No secret values were printed.
- No Telegram token was printed.
- No API key value was printed.
- No auth file was printed.
- No `.env` file was modified.
- Strict API payload scans found zero secret-shaped values.
- The only files prepared for commit are Markdown/PDF reports.

Exact Next Step

Stage the Day 1 report artifacts, run a staged secret scan, commit, push, and pull the report-only commit to production. Then proceed to Day 2: Agent Zero commander track and Telegram route proof.
