Day 32 â Bridge Final Closeout 100% Closure

Date: 2026-05-09

Lane: Bridge final lifecycle closeout

Status: CLOSED WITH SERVICE_DOWN

Blocker classification: SERVICE_DOWN

Exact blocker: 'buildwiki_run_now_systemctl_failed'

What Was Implemented

Day 32 closes the Bridge lifecycle work across Days 23â 31:

- Approval request persistence is in place.
- Audit event persistence is in place.
- Read-only approval queue is available.
- Approval audit report export is available.
- Pending approval creation works.
- Approval denial works and does not execute.
- Approval approval works.
- Generic approved requests do not execute without a scoped runner.
- Agent Zero protected actions now create pending Bridge approval requests.
- Build-Wiki Run Now creates a scoped 'buildwiki.run_now' request and does not run immediately.
- Build-Wiki owner approval attempts only the exact scoped service command.
- Failed scoped execution records a failed connector run and audit row.
- Completed scoped execution is covered by tests with a mocked successful 'systemctl' path.

No new source change was needed in this day. The final closeout used the current branch implementation and produced runtime proof plus report artifacts.

Files Changed

Day 32 report/proof artifacts:

- 'runtime/day-32-bridge-final-closeout-proof.json'
- 'runtime/day-32-bridge-final-closeout-100-closure.md'
- 'runtime/day-32-bridge-final-closeout-100-closure.pdf'

Relevant source in current lineage:

- 'src/app/api/bridge/approval-requests/route.ts'
- 'src/app/api/bridge/approval-requests/[id]/approve/route.ts'
- 'src/app/api/bridge/approval-requests/[id]/deny/route.ts'
- 'src/app/api/bridge/approval-requests/audit-report/route.ts'
- 'src/app/api/bridge/agent-zero/execute/route.ts'
- 'src/app/api/bridge/brain-sync/build-wiki/run-now/route.ts'
- 'src/app/api/bridge/brain-sync/build-wiki/run-now/[id]/dispatch/route.ts'
- 'src/lib/bridge-approval-lifecycle.ts'
- 'src/lib/bridge-approval-request-store.ts'
- 'src/lib/build-wiki-run-now.ts'
- 'src/lib/build-wiki-run-now-dispatch.ts'

Key source commits:

- '3cd524e' â approval lifecycle and Build-Wiki Run Now gate
- '39fc228' â dispatch Build-Wiki Run Now after approval
- '6be243f' â approval audit report export
- 'fb97736' â approval denial security coverage
- 'f285db8' â Agent Zero protected action approval request creation

Routes / Endpoints Verified

- 'GET /api/bridge/approval-requests'
- 'POST /api/bridge/approval-requests'
- 'POST /api/bridge/approval-requests/[id]/approve'
- 'POST /api/bridge/approval-requests/[id]/deny'

- 'GET /api/bridge/approval-requests/audit-report'
- 'POST /api/bridge/agent-zero/execute'
- 'GET /api/bridge/brain-sync/build-wiki/run-now'
- 'POST /api/bridge/brain-sync/build-wiki/run-now'
- 'POST /api/bridge/brain-sync/build-wiki/run-now/[id]/dispatch'

Runtime Proof

Local Mission Control standalone runtime:

- Bind: '127.0.0.1:3337'
- '/login': '200'
- unauthenticated approval queue: '401'
- authenticated approval queue before proof: '200'
- audit report: '200'

Lifecycle proof:

- Pending approval created: 'true'
- Denied approval: 'true'
- Approved generic request without execution: 'true'
- Scoped execution attempted after Build-Wiki approval: 'true'
- Failed execution recorded: 'true'
- Completed execution covered by tests: 'true'
- Audit rows written: 'true'

Build-Wiki scoped execution result:

- approval state: 'approved'
- target service: 'opencloud-docs-farmer.service'
- dispatch mode: 'run_now_dispatched_failed'
- run state: 'failed'
- accepted for execution: 'true'
- execution enabled: 'true'
- blocked reason: 'buildwiki_run_now_systemctl_failed'

The failed dispatch is expected in this local runtime because the required 'systemctl' service command is not available here. The route still wrote the failed run and audit record and did not broaden scope beyond the approved Fork 1 service.

Proof artifact:

- 'runtime/day-32-bridge-final-closeout-proof.json'

Tests Run

- Focused Bridge lifecycle suite:
 - 'src/app/api/bridge/approval-requests/[id]/approve/route.test.ts'
 - 'src/app/api/bridge/approval-requests/[id]/deny/route.test.ts'
 - 'src/app/api/bridge/approval-requests/audit-report/route.test.ts'
 - 'src/app/api/bridge/brain-sync/build-wiki/run-now/route.test.ts'
 - 'src/app/api/bridge/brain-sync/build-wiki/run-now/[id]/dispatch/route.test.ts'
 - 'src/lib/bridge-approval-lifecycle.test.ts'
 - 'src/lib/bridge-approval-ui-state.test.ts'
 - 'src/lib/agent-zero-bridge-session.test.ts'
 - 'src/lib/agent-zero-execution-gateway.test.ts'
- PASS: 9 files / 39 tests
- 'pnpm run typecheck'
 - PASS
- 'pnpm run build'
 - PASS
- 'git diff --check'
 - PASS
- 'node scripts/check-protected-file-invariants.mjs'
 - PASS
- '.env' diff check
 - PASS, no '.env' changes

Fresh full-suite validation on the same source lineage before the Day 32 proof/report artifacts:

- 'pnpm test'
- PASS: 156 files / 1324 tests

Remaining Blocker

'SERVICE_DOWN': the live Build-Wiki service dispatch cannot complete in this local runtime because the exact service command fails.

This does not block developer-side Bridge lifecycle closure because:

- approval creation is proven live
- denial is proven live
- approval without execution is proven live
- scoped execution attempt is proven live
- failed execution/audit is proven live
- successful scoped execution is covered by tests
- scope remains only 'opencloud-docs-farmer.service'

Owner/admin action to convert the service lane to live success:

- Run Mission Control on the runtime host where 'systemctl --user start opencloud-docs-farmer.service' is available to the service user.
- Then repeat the approved Build-Wiki Run Now dispatch proof.

Safety Confirmation

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No SMB / Fork 2 / external farmers.
- No second vault.
- No Zapier writes.
- No HeyGen generation.
- No broad connector execution.
- No fake Bridge execution success.
- No raw local paths exposed in proof/report artifacts.

Commit / Push

Day 32 report commit:

- this report artifact commit

Push:

- pending report commit and push

Rollback

Source rollback if Bridge lifecycle behavior must be removed:

```
""bash
git revert f285db8 39fc228 6be243f fb97736 3cd524e
""
```

Report rollback:

```
""bash
git revert <day32_report_commit_sha>
""
```

Next Day Started

Day 33 â Build-Wiki / Farmer Run Now 100% Closure starts automatically after this report is committed and pushed.
