

day-08-next-1-bridge-approved-execution-proof

Day 08 NEXT-1 â Bridge Approved Execution Proof

Objective

Use persisted Bridge approval/audit tables to prove one approved scoped action, or return exact blocker.

Result

PARTIAL PASS (approval persistence proven; approved execution still blocked).

Actions Executed

1. Queried active Bridge Session status.
2. Opened exact-scope Bridge Session request.
3. Listed pending approval requests.
4. Attempted approval route in Mission Control mirror path.
5. Re-checked session status and execution adapter surface.
6. Attempted scoped and out-of-scope execution probes.
7. Verified DB persistence counts.

Commands / Routes / Proof

- Evidence: 'runtime/day-08-next-1-bridge-proof.json'
- Route results:
 - 'GET /api/bridge/agent-zero/bridge-session' -> '200'
 - 'POST /api/bridge/agent-zero/bridge-session' -> '201' (pending approval)
 - 'GET /api/bridge/approval-requests' -> '200'
 - 'POST /api/bridge/approval-requests/{id}/approve' -> '423' (owner-channel approval required)
 - 'POST /api/bridge/agent-zero/execute' probes -> blocked
- DB proof:
 - 'bridge_approval_requests': '1'
 - 'bridge_audit_events': '1'
 - 'approved_requests': '0'
 - 'pending_requests': '1'

Blockers

- 'owner_approval_pending'
- 'active_bridge_session_required'

Owner Approval Action Package

1. Open Mission Control -> Gateway -> Policies / Bridge.
2. Approve the existing pending Bridge request (do not create duplicates).
3. Keep scope restricted to one safe action for proof.
4. Notify Codex; Codex will execute exactly one scoped action and verify audit + expiry.

Files Changed

- 'runtime/day-08-next-1-bridge-approved-execution-proof.md'
- 'runtime/day-08-next-1-bridge-approved-execution-proof.pdf'
- 'runtime/day-08-next-1-bridge-proof.json'

Tests

- Focused Bridge API/persistence proof only.

Services

- Mission Control runtime active on '127.0.0.1:3337'.

Commits / Rollback

- Commits: pending Day 08 batch commit.
- Rollback (report-only): 'git revert <day08_report_commit_sha>'

No-Secrets Confirmation

- No secrets printed.
- No auth file contents printed.
- No '.env' changes.

Updated Percentage

- Bridge Session confidence increased for persistence/audit.
- Bridge remains PARTIAL GO until one approved scoped action executes successfully.

Exact Next Step

Proceed to Paperclip service recovery and Telegram/Drive/AgentMail/YouTube live-proof lanes while awaiting owner approval.
